### Maui

- ❖ County of Maui
- ❖ Family Life Center
- ❖ Ka Hale A Ke Ola
- ❖ Mental Health Kokua

Mahalo to Tien Lum and Dan Sereno for their help with this year's geographic and data visualizations.

## Executive Summary

Ka Mana O Na Helu (KMNH) is the Collaborative Applicant and Homeless Management Information System (HMIS) Lead Agency for Bridging The Gap (BTG) Continuum of Care and is responsible for assisting with the implementation of the local Point-in-Time Count (PIT) and reporting the findings to BTG and the U.S. Department of Housing and Urban Development (HUD). KMNH has prepared this report to convey 2026 PIT results, and to compare this data to prior years. The official night of the 2026 PIT was Sunday, January 25, 2026.

This report presents a detailed view of regional homelessness, including demographic information and county profiles of homelessness by sub-population for the rural counties of Hawai`i, Kaua`i, and Maui. The goal of this report is to inform the community at large, elected officials, government agencies, and other stakeholders of the immediate homeless situation on the neighbor islands. This report provides comprehensive data to promote informed decision-making for future funding activities, local strategic planning efforts, capacity building, and program development within BTG. Findings from the local PIT effort assist the federal, state, and county government in better understanding the extent and nature of homelessness.

A full PIT consists of both a sheltered count and an unsheltered count. A sheltered count is required annually, whereas an unsheltered count is required at least biennially. BTG was not required to conduct an unsheltered count in 2025 and thus elected not to do so. Prior to 2026, the last full PIT that BTG completed was in 2024. Where full PIT results are compared below, 2026 data is compared to 2024 data, and excludes non-congregate shelter (NCS) data from these comparisons, since 2024 NCS data significantly increased sheltered and total counts that year.

Results from the 2026 PIT revealed a two percent decline in total one-day homelessness from 1,895 people in 2024 to 1,863 people in 2026. This 32-person reduction can be attributed to net decreases for each of the rural counties. Compared to 2024 data, Hawai`i attained a three percent reduction overall, while Kaua`i and Maui achieved one percent reductions. On Hawai`i and Kaua`i the decreases were driven by a decline in unsheltered homelessness, while on Maui the reduction was the result of a large decrease in sheltered homelessness.

The overall decrease in 2026 was fueled by a 10 percent drop in sheltered homelessness to 558 people compared to 619 in 2024. For BTG, unsheltered homelessness rose by two percent from 1,276 people in 2024 to 1,305 people in 2026. Both Hawai`i and Kaua`i experienced declines in their unsheltered counts, while Maui data showed a large increase of 113 people compared to 2024. Maui unsheltered data rose nearly 40 percent, from 285 to 398 people in 2026. Compared to 2024, the number of sheltered homeless residing in emergency or transitional facilities decreased nearly 10 percent from 619 to 558 people. Changes contributing to this 61-person reduction included increases of 38 and 17 people in Hawai`i and Kaua`i respectively, and a 116-person decrease in shelter utilization on Maui. Sheltered 2026 data for Hawai`i, Kaua`i, and Maui showed 229, 76, and 253 total sheltered respectively.

An assessment of the type of individuals experiencing homelessness in 2026 found that of the 1,863 total people counted, 1,396 were individuals, or 75 percent of the total one-day estimate. Individuals are defined throughout this report as people in households (single or multiple adults)

without children under the age of 18. A total of 467 family individuals within 125 families were homeless, including 38 families and 135 people in these families living unsheltered. The number of unsheltered families identified in 2026 declined 12 percent compared to 2024. A total of 76 children were living unsheltered within these 38 families, falling by 10 compared to the 86 identified in 2024. In 2026, 87 sheltered families were counted (81 in emergency shelters and six in transitional housing) encompassing 332 total people, including 188 children and 144 adults. Sheltered family homelessness declined three percent to 87 families in 2026, down three families compared to 2024. Sheltered family homelessness decreased by two families for Maui and Hawaii Island relative to 2024.

A review of BTG homeless subpopulation data showed that the total number of self-reported homeless veterans increased 19 percent to 88 veterans compared to the 2024 total of 74. A total of 70 unsheltered veterans were identified in 2026, up 11 veterans relative to the 2024 count. Maui registered the largest increase in unsheltered veterans, up six compared to the 11 identified in 2024. An unsheltered count was not conducted in 2021 due to the COVID-19 pandemic or in 2025 as decided by the BTG Board of Directors.

Data from 2026 showed an increase in chronic homelessness among individuals compared to 2024 data, rising 33 people to 707 chronic individuals. This equates to a five percent increase comparatively and shows that 51 percent of the 1,387 homeless individuals are chronically homeless in 2026. As a proportion of this population, the rate increased by three percent compared to 2024. The chronic homeless data presented in this report derived from self-reported responses to disability and length of homelessness questions. Nine homeless individuals residing in transitional housing were excluded from this calculation since people residing in transitional housing are excluded from this calculation per HUD's definition. The rate of chronicity was lower among the 217 individuals residing in emergency shelters and for 2026 was 41 percent.

This report tabulates data on unaccompanied and parenting youth households (see Appendix 2, Tables 5 and 6). Unaccompanied youth are defined by HUD as people in households without children who are not part of a family with children or accompanied by their parent or guardian during their homelessness, and who are all 24 years of age or younger. BTG reported 33 unaccompanied youth households in 2026, with 25 living unsheltered. The 2026 unaccompanied youth household count decreased by 12 households compared to the 45 reported in 2024.

A parenting youth household is defined by HUD as a family household with all parents under the age of 25. In 2026, BTG reported a total of eight parenting youth households with 26 total people, including 13 children. The number of parenting youth households reported in 2026 decreased by one compared to 2024.

Given the numbers of homeless found in these counts and the state and federal initiatives to reduce homelessness, continued recommendations to improve the overall implementation of the count include the planning, supervision and execution of the count's efforts, the training of count staff and volunteers, the handling and verification of all survey forms and electronic data, and continued data quality controls by outreach funders and the CoC.

## Definition of Key Terms

Key terms used in this report are used for PIT reporting purposes. Definitions of these terms may differ in some ways from the definitions found in the Homeless Emergency Assistance and Rapid Transition to Housing (HEARTH) Act and in HUD regulations.

**Chronically Homeless (CH) Individual** refers to an individual with a disability who has been continuously homeless for one year or more or has experienced at least four episodes of homelessness in the last three years where the combined length of time homeless in those occasions is at least 12 months.

**Chronically Homeless (CH) People in Families** refers to people in families in which the head of household has a disability and has either been continuously homeless for one year or more or has experienced at least four episodes of homelessness in the last three years where the combined length of time homeless in those occasions is at least 12 months.

**Continuum of Care (CoC)** is the local planning body responsible for coordinating the full range of homeless services in a geographic area.

**Emergency Shelter (ES)** is a facility with the primary purpose of providing temporary, short-term shelter for homeless people.

**Family Individuals** are homeless as part of a household that has at least one adult (age 18 and older) and one child (under age 18).

**Homeless** describes a person who lacks a fixed, regular, and adequate night-time residence.

**Homeless Management Information System (HMIS)** is the information system designated by the CoC to comply with the data collection requirements prescribed by HUD.

**Housing Inventory Count (HIC)** is produced by each CoC and provides an annual inventory of beds that assist people in the CoC who are experiencing homelessness or leaving homelessness.

**Individual** refers to a person who is not part of a family with children during an episode of homelessness. Individuals may be homeless as single adults, unaccompanied youth, or in multiple-adult or multiple-child households.

**Other Permanent Housing** is housing with or without services that is specifically for formerly homeless people but that does not require people to have a documented disability.

**Parenting Youth** are people under age 25 who are the parents or legal guardians of one or more children (under age 18) who are present with or sleeping in the same place as that youth parent, where there is no person over age 24 in the household.

**Parenting Youth Household** is a household with at least one parenting youth and the child or children for whom the parenting youth is the parent or legal guardian.

**Point-in-Time Counts (PIT)** are unduplicated one-night estimates of sheltered and unsheltered homeless populations. The one-night counts are conducted by CoCs nationwide and occur during the last 10 days in January of each year.

**Permanent Supportive Housing (PSH)** is a housing model designed to provide housing assistance and supportive services on a long-term basis to formerly homeless people. PSH programs require that clients have a documented disability for eligibility.

**Rapid Re-housing (RRH)** is a housing model designed to provide temporary housing assistance to people experiencing homelessness, moving them quickly out of homelessness and into permanent housing.

**Sheltered Homelessness** refers to people who are staying in emergency shelters or transitional housing programs.

**Transitional Housing (TH) Programs** provide people experiencing homelessness a place to stay combined with supportive services for a longer duration of time than emergency shelters, typically up to two years.

**Unaccompanied Homeless Youth (under 18)** are people in households with only children who are not part of a family with children or accompanied by their parent or guardian during their episode of homelessness, and who are under the age of 18.

**Unaccompanied Homeless Youth (18-24)** are people in households without children who are not part of a family with children or accompanied by their parent or guardian during their episode of homelessness, and who are between the ages of 18 and 24.

**Unsheltered Homelessness** refers to people whose primary nighttime location is a public or private place not designated for, or ordinarily used as, regular sleeping accommodations for people (for example, the streets, vehicles, beaches, or parks).

**Veteran** refers to any person who served on active duty in the armed forces of the United States. This includes Reserves and National Guard members who were called up to active duty.

## Overview

The 2026 PIT represents the best available data to estimate homelessness within the rural counties of Hawai`i, Kaua`i, and Maui on the night of January 25, 2026. The estimate adheres to the federal definition of homelessness which includes individuals and families residing in emergency shelters, transitional housing facilities, and people identified as sleeping and living in an unsheltered location on the night of the count. The count is neither a measure of housing stability among people residing in housing nor a measure of the conditions of such housing and the general housing environment. HUD requires BTG to produce an unduplicated estimate of sheltered and unsheltered homelessness on a one-day point-in-time conducted during the last 10 days of January. The count is a one-day snapshot of homelessness.

The main objective during this year's count was to obtain a reliable estimate of sheltered and unsheltered homeless individuals and families. The count helps to assess current levels of homelessness by household type, provide estimates for levels of veteran, chronic, unaccompanied youth, and parenting youth homelessness, and measure the prevalence of other underlying causes of homelessness such as mental health and substance use disabilities. Each year, PIT reporting is an integral part of local and national planning and serves to support policy and resource allocation decisions.

BTG's Homeless Management Information System (HMIS) was utilized to extract most of the sheltered data needed for this report and continues to serve as the repository for surveys collected during the unsheltered canvassing. The HMIS was used to count 455 of the 558 sheltered homeless this year (82 percent). The HMIS is a centralized database used to record services rendered to homeless individuals by service providers throughout BTG. Service providers receiving federal, state, or county funding participate in the HMIS as required. Some privately funded agencies voluntarily use HMIS due to its reporting capabilities.

To ensure that sheltered HMIS client and enrollment data was accurate, administrators contacted emergency and transitional shelter providers leading up to the count and confirmed that all clients sleeping in these facilities on the night of the count had active HMIS records. Five domestic violence shelters and one temporary emergency shelter not participating in the HMIS were contacted individually and asked to complete a manual survey for the night of the count. These six shelters accounted for 103 of the 558 total sheltered this year (18 percent).

For the unsheltered component of the PIT, BTG implemented a multi-day canvassing effort in 2026. This encompassed a multi-day physical count that occurred between Monday, January 26<sup>th</sup> and Saturday, January 31<sup>st</sup>. Field staff and volunteers asked all individuals appearing or known to be homeless during this period, "Where did you sleep this past Sunday, January 25<sup>th</sup>?" to help ensure that those counted were living in places not meant for human habitation on the night of the count. In 2026, Hawai`i Island continued to collect data on five descriptive questions on the Single and Head of Household surveys. These questions solicited information from respondents related to duration in Hawai`i, cause of homelessness, criminal history, emergency room utilization, and what services could be provided to assist in ending homelessness. Responses to these questions are detailed more extensively in the "Hawai`i Island Additional Unsheltered Questions" section of this report.

Unsheltered survey data was analyzed and used to create Tableau and ArcGIS dashboard data visualizations comparing PIT data since 2015. These dashboards accompany the tables presented in this report and can be found on the [BTG Website](#) under the Reports menu header.

The unsheltered survey form is largely based on HUD-defined data collection. Surveys collected during the count were reviewed for accuracy and completeness, entered in the PIT module of the HMIS, unduplicated, and analyzed to obtain the final statistics included in this report. PIT resources and forms can be accessed from the BTG website. The following unsheltered surveys were not included in the final unsheltered tally.

- Clients who reported living in a sheltered situation on the night of January 25, 2026.
- Duplicate surveys or records that were already counted in the sheltered component.

Stakeholders, regional leaders, homeless service providers, and volunteers attended several planning meetings and virtual training leading up to the PIT. The purpose was to convey the count's methodology to all involved, provide background and instructions, and to answer any questions regarding the surveys and methodology used during the unsheltered count.

Field staff were composed of team members from service agencies that regularly perform outreach to unsheltered homeless individuals. Survey teams were assigned to familiar regions to ensure that many of the high-density areas frequented by unsheltered homeless people were surveyed. Skilled outreach staff familiar with these geographic areas and known to individuals experiencing homelessness were more likely to obtain accurate information. Service-based locations, such as food pantries or drop-in centers were also covered extensively during the count to reach additional unsheltered homeless.

## BTG Summary

Table 1 summarizes sheltered, unsheltered, and total homelessness for BTG since 2018. Unsheltered counts were not conducted in 2021 and 2025. Individual and family homelessness is delineated within each component to highlight year-over-year differences between these groups. Dashboards identifying trends in homelessness for BTG, and the rural counties can be viewed from the website link presented in the Overview section.

The 2026 PIT data show a decrease in total homelessness to 1,863 people and overall reductions in homelessness for both individuals and families. Compared to 2024, sheltered homelessness decreased by 61 people to 558 in 2026. Unsheltered homelessness increased by 29 people to 1,305 in total.

## BTG Homeless Subpopulations

BTG collected data on the subpopulations presented below in 2026. Table 2 highlights this data for BTG since 2018 and segments the data by project type. Sheltered statistics are broken out by emergency shelter and transitional housing project type. Results show decreases in the levels of chronically homeless families and adults with serious mental illness. Veteran homelessness increased 19 percent to 88 veterans.

**Table 2: BTG Homeless Subpopulations, 2018-2026**

## BTG Sheltered Projects Listing

Table 3 displays the full list of sheltered projects contributing to the 558 people counted under the sheltered component this year. Projects are sorted by county, project type, then name. Maui does not currently have sheltered projects classified under the transitional housing project type. Projects not participating in the HMIS accounted for 103 total people (18%) and are italicized for reference.

## Length of Stay (LOS) Statistics for Sheltered HMIS Projects

Table 4 displays descriptive LOS statistics for the sheltered HMIS projects included in 2026. LOS for each person served is measured from project entry date through the PIT date. Data by project was then aggregated to produce the statistics presented. Providers are encouraged to review LOS data in relation to HMIS data quality, since generally average LOS for emergency shelter projects should be less than 120 days. Projects with average LOS greater than this threshold should review client rosters and develop transition plans to reduce homelessness duration. Reducing LOS improves BTG system performance in this area and allows the project to serve more clients through additional bed or unit turnover.

## Hawai`i Island Summary

Table 5 summarizes sheltered, unsheltered, and total homelessness for Hawai`i Island since 2018. Individual and family homelessness is broken out within each component to highlight year-over-year differences between these key groups. Charts identifying trends in homelessness for Hawai`i Island can be viewed from the dashboards link presented in the Overview section.

PIT data for Hawai`i Island show a decrease in total homelessness of 22 people compared to 2024, a reduction of three percent. Sheltered homelessness increased by 38 people, while the unsheltered population decreased by 60 people. The total number of homeless families was 33, eight fewer than in 2024. There were 28 sheltered families identified this year, two fewer than in 2024, yet six higher than the 22 identified in 2025. Unsheltered family homelessness declined by six families to five in 2026.

## Hawai`i Island Homeless Subpopulations

Hawai`i Island collected data on the subpopulations presented below in 2026. Table 6 highlights this data since 2018 and segments the sheltered data by emergency and transitional project type. Compared to 2024, overall results include reductions in the levels of chronically homeless individuals and families and declines in the number of adults with reported serious mental illness or chronic substance use issues.

## Hawai'i Island Unsheltered Homelessness

Tables 7 and 8 present data on Hawai'i Island unsheltered homelessness since 2018. Data conveys responses to the survey question “Where did you sleep the night of Sunday, Jan 25, 2026?”. The nine unsheltered regions have remained consistent over the years presented and the regional map can be found in Appendix 1. Table 7 highlights differences in total people, while Table 8 outlines differences in households. Regarding total people, unsheltered homelessness declined 11 percent over the two-year period, with the largest numerical decrease in the South Hilo region. Total households decreased by 49 compared to 2024, with large percentage declines in both family and individual households. The number of unsheltered families decreased by six households, or 88 percent. Over the years presented, there has been a continual reduction in the number of unsheltered families, with only five families remaining unsheltered as of the PIT.

**Table 7: Hawai'i Island Unsheltered Homeless Individuals by Region, 2018-2026**

## Hawai`i Island Additional Unsheltered Questions

In 2026, Hawai`i Island collected data on five additional questions through its unsheltered canvassing efforts. The following questions were included on the Single and Head of Household survey forms and were only administered on Hawai`i Island.

- *Did you move to Hawai`i within the past year?*
- *What led to your current living situation?*
- *Have you been arrested in the last year?*
- *How many times have you been to the emergency room in the past year?*
- *What can we do to help you end your homelessness?*

Table 9 presents response data from the question “*Did you Move to Hawai`i within the past year?*”. Of the 443 households surveyed, 39 stated that they had moved to Hawai`i within the past year. One family household responded “yes”, while the remaining 38 came from individual households. Tables 10 through 12 present data for households responding “yes” to this question.

**Table 9: Did you move to Hawai`i within the past year?**

	Fam HH	Individual HH	Total
Yes	1	38	39
No	4	381	385
Unknown/Refused		19	19
<b>Total</b>	<b>5</b>	<b>438</b>	<b>443</b>

**Table 10: If yes, what state or country did you come from?**

	Fam HH	Individual HH	Total

<b>Foreign Country</b>	<b>0</b>	<b>1</b>	<b>1</b>
Micronesia		1	1
<b>Total Households</b>	<b>1</b>	<b>38</b>	<b>39</b>

Of the 39 households stating that they moved to Hawai`i within the past year, 38 came from states within the U.S., while one moved from a foreign country. Of the 38 state responses, most came from California. Ten of the 39 households (26%) that reported moving to Hawai`i within the past year indicated that they would be interested in returning home. This data is presented in Table 11.

**Table 11: If yes, are you interested in returning home?**

	Fam HH	Individual HH	Total
Yes		10	10
No	1	28	29
<b>Total</b>	<b>1</b>	<b>38</b>	<b>39</b>

For the 39 households that arrived within the last year, Table 12 displays data on why they moved to Hawai`i.

**Table 12: If yes, why did you come to Hawai`i?**

	Fam HH	Individual HH	Total
Came for work/trade living arrangement		5	5
Came for the weather	1	6	7
To be with family or friends and it didn't work out		14	14
Other reason		13	13
<b>Total</b>	<b>1</b>	<b>38</b>	<b>39</b>

Table 13 presents data from the survey question “*What led to your current living situation?*”. This question allowed only one selection, intended to be the primary reason that each household was living unsheltered. Of the 443 households surveyed, all responded. Excluding the “Other reason” response, the top three most prevalent responses were family/relationship conflict, unable to afford rent, and disability. These three reasons comprised 234 responses or 53 percent of the total.

**Table 13: What was the primary reason that led to your current living situation?**

	Fam HH	Ind HH	Total	% of Total
COVID-19		9	9	2.0%
Disability (mental/addiction/physical)		47	47	10.6%

Natural Disaster		1	1	0.2%
Recently released from incarceration		5	5	1.1%
Unable to afford rent	1	63	64	14.4%
Unable to secure affordable housing	1	10	11	2.5%
Other reason		96	96	21.7%
<b>Total</b>	<b>5</b>	<b>438</b>	<b>443</b>	<b>100.0%</b>

Table 14 presents data from the question “*Have you been arrested in the last year?*” Of the 443 households surveyed, 107 stated that they had been arrested in the last year. None of the families surveyed indicated that they had been arrested. Tables 15 and 16 present data for households responding that they had been arrested in the last year. Table 15 groups response data into three categories, as this question asked, “How many times?” on the survey form. Table 17 presents data from the survey question “*How many times have you been to the emergency room in the past year?*”.

**Table 14: Have you been arrested in the last year?**

<b>Total</b>	<b>5</b>	<b>438</b>	<b>443</b>

Table 18 presents data from the survey question “*What can we do to help you end your homelessness?*”. This question allowed for multiple response selections intended to convey data on what services can be provided to assist in resolving the household’s unsheltered homelessness. The percentage for each service line is based on a universe of 443 total households. “Securing housing”, and “Money/Rent assistance” were the top two responses. Replacing lost or stolen documents came in third, just under 40 percent.

**Table 18: What can we do to help you end your homelessness?**

## Kaua`i Summary

Table 19 summarizes sheltered, unsheltered, and total homelessness data for Kaua`i since 2018. Individual and family homelessness is delineated within each component to detail year-over-year differences between these key groups. Charts identifying trends in homelessness for Kaua`i can be viewed from the dashboards link presented in the Overview section.

PIT data for Kaua`i show a seven person decrease in total homelessness compared to 2024, a reduction of one percent. Relative to 2024, sheltered homelessness increased by 17 people, while the unsheltered population decreased by 24 people, a reduction of five percent. Unsheltered homelessness among family individuals decreased by 24 people, nearly 26 percent less than the level two years prior.

## Kaua`i Homeless Subpopulations

Kaua`i collected data on the subpopulations presented below in 2026. Table 20 highlights this data since 2018 and segments the sheltered data by emergency and transitional project type. Compared to 2024, overall results include reductions in the total number of chronically homeless families and adults reporting chronic substance use issues.

**Table 20: Kaua`i Homeless Subpopulations, 2018-2026**

## Kaua`i Unsheltered Homelessness

Tables 21 and 22 present data on unsheltered homelessness on Kaua`i since 2018. Data conveys responses to the survey question “Where did you sleep the night of Sunday, Jan 25, 2026?”. The five unsheltered regions listed have remained consistent over the years presented and the regional map can be found in Appendix 1. Table 21 highlights differences in total people, while Table 22 outlines differences in households. Regarding total people, unsheltered homelessness declined five percent over the two-year period, with the largest numerical decrease occurring in the South Central and East regions. The number of unsheltered families decreased by three, or 14 percent; while the number of individual households increased by nine to 337 households.

## Maui Summary

Table 23 summarizes sheltered, unsheltered, and total homelessness for Maui since 2018. Individual and family homelessness is broken out within each component to highlight year-over-year differences between these key groups. Charts identifying trends in homelessness for Maui can be viewed from the dashboards link presented in the Overview section.

PIT data for Maui show a slight decrease in total homelessness of three people compared to 2024, a reduction of about one percent. Sheltered homelessness decreased by 116 people over the two-year period, while the unsheltered population grew significantly by 113 people. The total number of homeless families was 61, two more than in 2024. There were 47 sheltered families identified this year, two fewer than the 49 counted in both 2024 and 2025. Unsheltered family homelessness rose by four families to 14 in 2026.

## Maui Homeless Subpopulations

Maui collected data on the subpopulations presented below in 2026. Table 24 highlights this data since 2018 and segments the sheltered data by emergency and transitional project type. Compared to 2024, overall results include reductions in the levels of chronically homeless individuals and families and a decline in the number of adults with reported serious mental illness.

## Maui Unsheltered Homelessness

Tables 25 and 26 present data on Maui County’s unsheltered homelessness since 2018. Data conveys responses to the survey question “Where did you sleep the night of Sunday, Jan 25, 2026?”. Moloka`i was added as region seven this year, while the other six regions have remained consistent over the years presented. Table 25 highlights differences in total people, while Table 26 outlines differences in households. Regarding total people, unsheltered homelessness increased 40 percent over the two-year period, with the largest numerical increase in the Central Maui region. Total households increased by 81 compared to 2024, with large percentage increases in both family and individual households. The number of unsheltered families increased by four households, or 40 percent.

## Unsheltered Error Estimates and Outreach Coverage

Table 27 provides an estimate for the number of clients that were missed in this year’s unsheltered canvassing by county and for BTG. There was a total of 516 distinct clients active in BTG’s HMIS Street Outreach projects as of the PIT date. Of these clients, 355 were surveyed in the unsheltered count this year. Assuming all 516 clients were unsheltered as of the PIT date, this implies that 161 clients were missed, and that the unsheltered count’s true number should be at least 1,466, 12 percent higher than the 1,305 reported. This highlights the importance of reviewing street outreach project client rosters leading up to the count and including organizations with active street outreach clients in the count’s implementation for the region(s) that they provide outreach services. Data for each county contributing to BTG’s total is provided in the table below. Maui had the highest rate of active HMIS clients found in this year’s count at 74 percent and had the most active clients in its HMIS outreach projects, with 223. Hawai`i Island and Kaua`i found 69 and 63 percent of their active outreach clients respectively.

The table also shows a breakdown of the 1,305 clients identified in the unsheltered count. Of the 1,305 unsheltered clients, 950 or 73 percent were not actively enrolled in an HMIS street outreach project as of the PIT date, implying that only 355 clients were actively enrolled and receiving outreach services. Of the three counties, Maui had the highest enrollment rate for people encountered during the count, with 41 percent of the people surveyed receiving services through HMIS street outreach projects. Hawai`i Island had the lowest at only 16 percent. Given the volume of unsheltered homeless people found this year and the county, state, and federal initiatives to reduce unsheltered homelessness, ongoing recommendations include increasing housing focused street outreach funding to expand outreach personnel and fill gaps in service delivery in alignment with BTG policies and procedures.

**Table 27: Active HMIS Outreach Clients vs. Clients Identified in the Unsheltered PIT**

	Hawai`i	Kaua`i	Maui	BTG
Unduplicated clients in HMIS outreach projects, 1/25/26	111	182	223	516
Clients surveyed in the Unsheltered PIT	77	114	164	355
% surveyed in the Unsheltered PIT	69%	63%	74%	69%
Clients missed in the Unsheltered PIT	34	68	59	161
% missed in the Unsheltered PIT	31%	37%	26%	31%
Total clients surveyed in the 2026 Unsheltered PIT	467	440	398	1,305
Clients w/o an active HMIS outreach enrollment	390	326	234	950
% of clients w/o an active HMIS outreach enrollment	84%	74%	59%	73%

## Appendix 1: BTG Unsheltered Regional PIT Maps

### Hawai'i Island

**1 - North Kohala**  
 Mahukona, Kapa'a, Lapanai, 'Upolu Airport, King Kamehameha Park, Kohala Lighthouse, Keokea
