

Partners In Care
O'ahu's Continuum of Care

POINT IN TIME COUNT 2024

COMPREHENSIVE REPORT

Updated: 05-14-2024

WHAT IS THE POINT IN TIME COUNT (PIT)?

The O'ahu Point In Time Count (PIT) is an annual street and shelter count that determines the number of people experiencing homelessness on O'ahu on a single night in January. This project included a brief survey to identify the needs and characteristics of individuals and families experiencing homelessness. Every Continuum of Care in the U.S. is required to submit PIT Count results to the U.S. Department of Housing and Urban Development (HUD) as part of a national effort to identify the extent of homelessness across the country.

WHY IS IT IMPORTANT?

The PIT Count is an important source of data on homelessness. It is reported to Congress and affects the flow of federal funding to the community. Additionally, the PIT Count is a primary source of unsheltered homeless numbers and helps to inform communities on the number of people who do not access services such as Emergency Shelters or Transitional Housing at any given point in time.

POINT IN TIME COUNT ON O'AHU

Partners In Care - O'ahu's Continuum of Care is the lead organization for the O'ahu 2024 PIT Count. This responsibility included creating a digital survey to collect the data, soliciting volunteers and donations, and ensuring the health and safety of volunteers and community members, analysis of the collected information. The O'ahu Continuum of Care is a membership organization that is made up of more than 70 agencies and other stakeholders that provide services throughout the island of O'ahu to those experiencing homelessness. The Count was split among 7 regions across the island based on outreach territories.

IMPORTANT CONSIDERATIONS

The PIT Count is a one-night snapshot of homelessness that is limited by weather conditions, number of volunteers and their training, self-reported survey responses, and other factors. There are more people who experience homelessness over the course of the year than on any given single night. Every year, the Continuum of Care works toward improving the Count's accuracy. The O'ahu Continuum of Care is committed to using data from the PIT Count and the O'ahu Homeless Management Information System (HMIS) to understand more about the population experiencing homelessness on O'ahu and to provide solutions that will make homelessness rare, brief, and a one-time experience.

Partners In Care's mission is to eliminate homelessness through open and inclusive participation and the coordination of integrated responses.

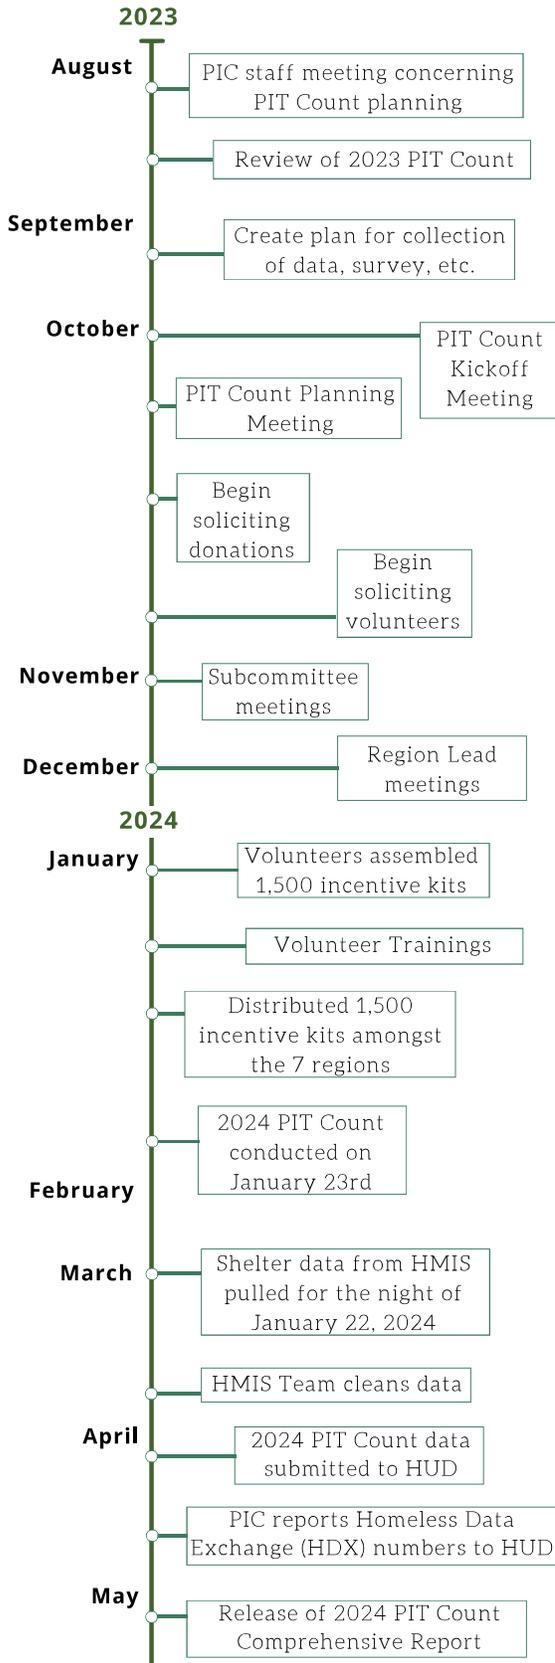

MAHALO

Mahalo to the 300+ volunteers and organizations who made the 2024 Point In Time Count a success. This collaborative effort shows that the O'ahu community is committed to helping the most vulnerable in our society. We couldn't have done it without you!

METHODOLOGY

The Point In Time (PIT) Count was held on January 23, 2024, from 6:00 a.m. – 10:00 p.m., asking individuals where they slept on the night of January 22, 2024.

- The unsheltered count relies on interviews and observations taken by volunteers.
- The sheltered count relies on data exports from the Homeless Management Information System.
- Capturing a snapshot of the O’ahu population in a short period of time requires months of planning and organization with service providers, government partners, outreach workers, and volunteers. Volunteers included previous volunteers, staff from our partner service agencies, and community individuals recruited through news and social media.

2024 Methodology

- We utilized a mobile app—Survey123 for ArcGIS—to collect surveys of unsheltered individuals. The app went through several phases of customization, testing, editing, and user feedback.
- Each surveyed participant provided self-reported answers to all survey questions in Survey123 for ArcGIS.
- An observational tool was included on the Survey123 mobile app to capture individuals who refused to be surveyed, were sleeping, or were inaccessible due to safety reasons. The observational tool is based on HUD's observational tool that captures minimal but highly important demographic information.
- The O'ahu PIT Count continues to take place on one day based on HUD's best practices and guidelines.
- A review of the number of individuals who received any type of homelessness system service is included in the community report this year to further inform our community on the utilization of services over the course of an entire year.

MAIN FINDINGS

4,494

people experiencing homelessness
on O'ahu on the night of January 22, 2024

62%

Unsheltered

2,766 individuals were staying on the streets or other places not meant for human habitation

38%

Sheltered

1,728 individuals were staying in Emergency Shelters, Transitional Housing or Vet Safe Haven

Change from 2023 - 2024

+12%

Total PIT Count

+17%

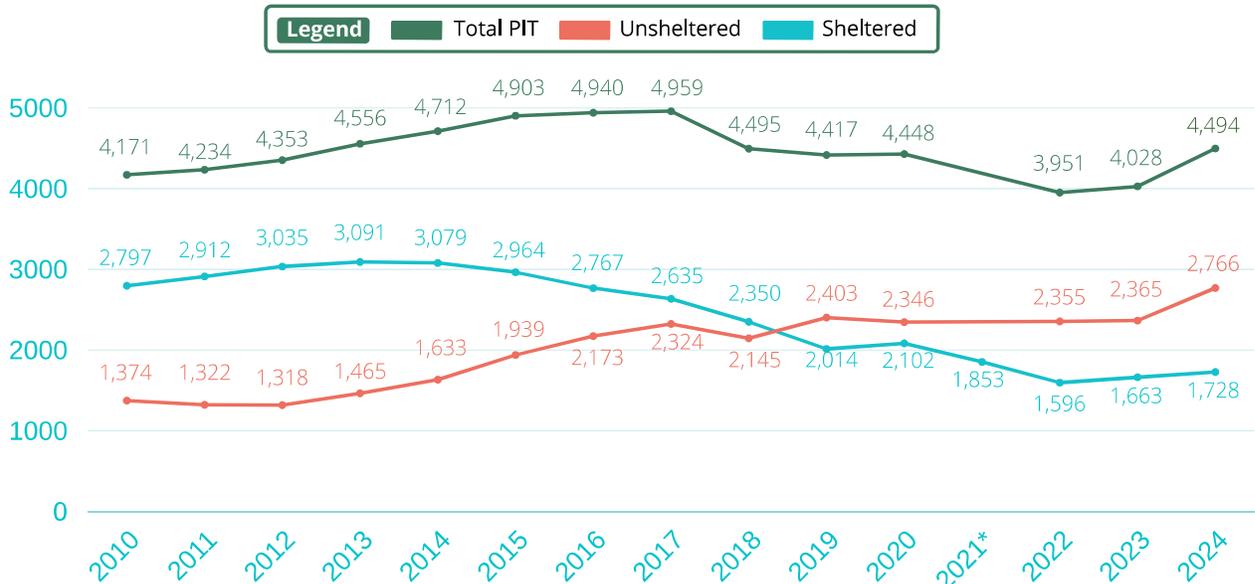

Unsheltered Count

+4%

Sheltered Count

From 2017 to 2022, the Point in Time Count showed a 26% decrease. However, all populations have seen increases since 2022. Examining the sheltered versus unsheltered populations, the sheltered count has **decreased** by 50% since 2010, and the unsheltered has **increased** by 62%, accounting for the bulk of the increase in the Point in Time count population

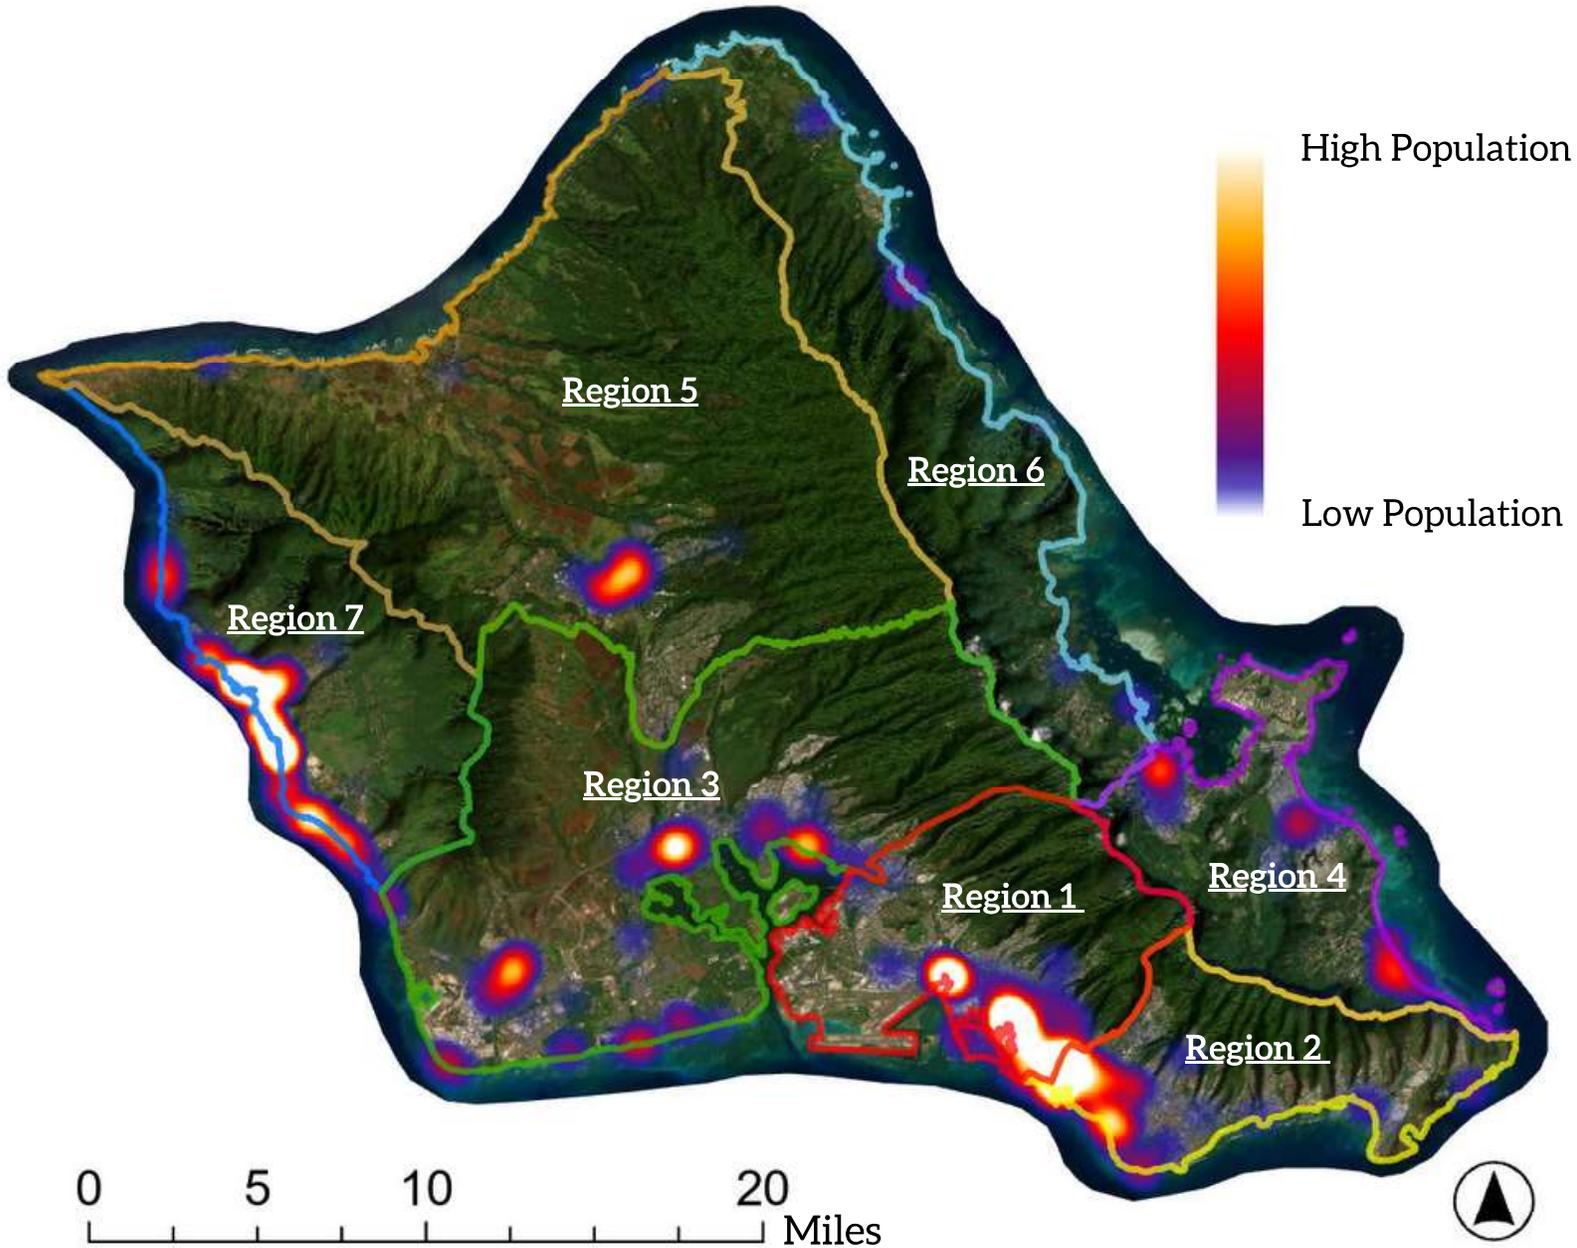

TOTAL PIT COUNT BY YEAR, 2010 - 2024

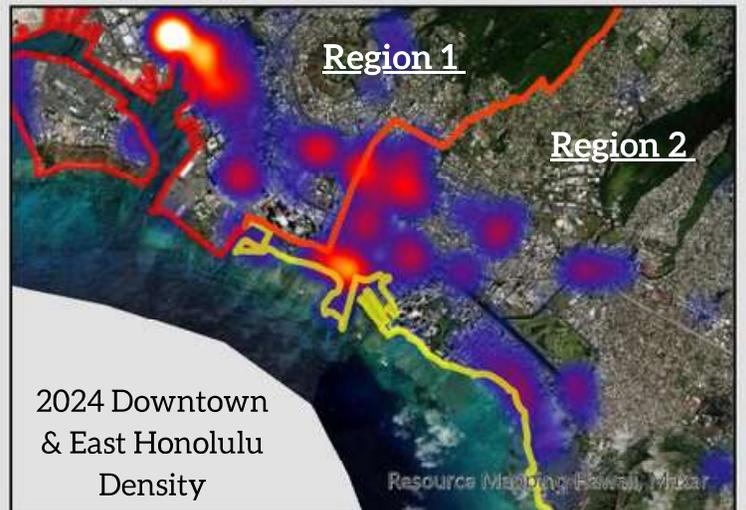

* The 2021 Unsheltered PIT Count was cancelled due to COVID-19.

Emergency Shelter (ES): Short-term accommodations providing shelter to individuals and families. **Transitional Housing (TH):** Mid-term accommodations, designed to provide housing and supportive services to clients to facilitate movement to independent living. **Safe Haven (SH):** A form of supportive housing that serves hard-to-reach homeless persons with severe mental illness (O'ahu does not currently have any HUD funded Safe Havens). Mental Health Kokua began a Safe Haven (Pu'u honua) on O'ahu in 1995. In 2016, it was re-categorized as a Permanent Supportive Housing Program under HUD's definition. **Vet Safe Haven (Vet SH):** A VA funded program that serves hard-to-reach homeless persons with severe mental illness (this is separate to HUD funded Safe Havens).

2024 PITC DENSITY MAP

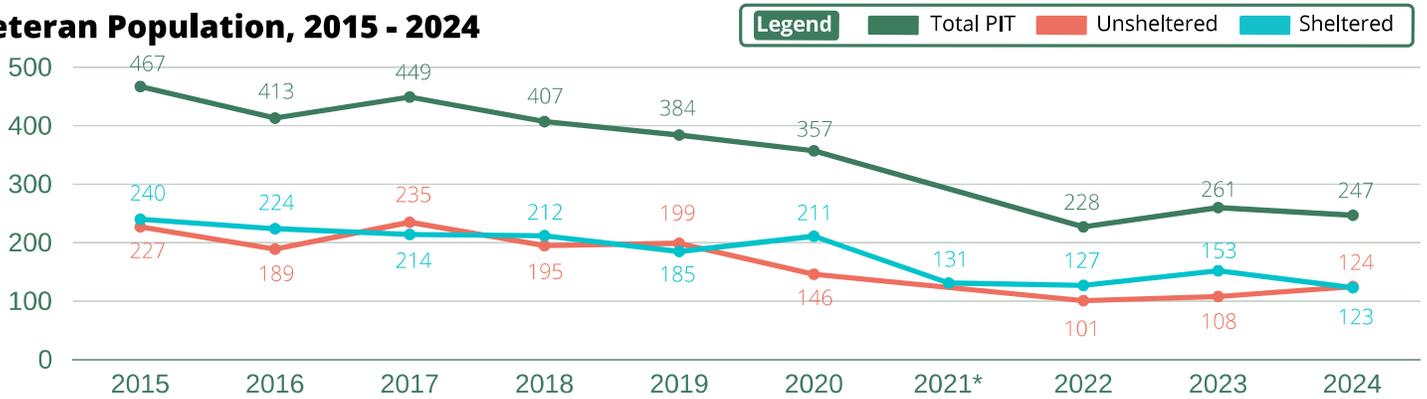

- Region 1: Downtown Honolulu
- Region 2: East Honolulu
- Region 3: Ewa / Kapolei
- Region 4: Kāneʻohe to Waimānalo
- Region 5: Wahiawā / North Shore
- Region 6: Upper Windward
- Region 7: Waiʻanae Coast

SUB-POPULATIONS OVER TIME

Veteran Population, 2015 - 2024

Veteran individuals experiencing homelessness have seen a steady and significant decrease since 2015, with both sheltered and unsheltered populations decreasing by at least 45% from 2015 to 2024. Over the last few years, there has been added attention to the veteran subpopulation through the Oahu Veterans Initiative (OVI) to end veteran homelessness. Veteran homelessness remained relatively stable from 2023 to 2024, with the number of total veterans decreasing by 5% from 2023 to 2024.

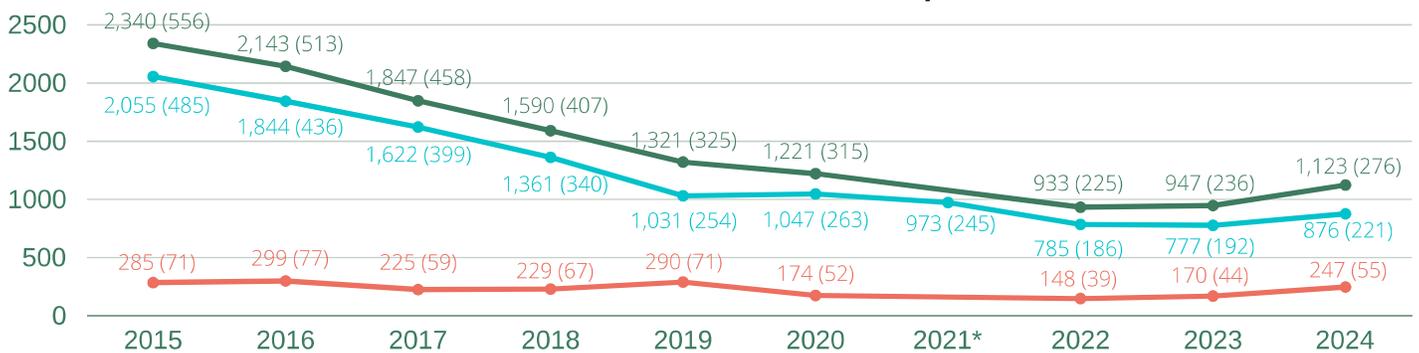

Veteran: A person who has served in the United States Armed Forces. For the purposes of this report we do not distinguish between active duty and non-active duty veterans. **Keiki:** Persons under 18 years old.

Keiki Population, 2015 - 2024

Of the 647 keiki in the 2024 PITC, 12 were unaccompanied minors and 635 were children in families. The number of keiki experiencing homelessness on O’ahu has decreased by 52% since 2015. Sheltered keiki decreased by 55%, from 1,174 in 2015 to 532 in 2024. Both sheltered and unsheltered have experienced an increase since 2022.

Number of Individuals in Households with Adults and Keiki, 2015 - 2024

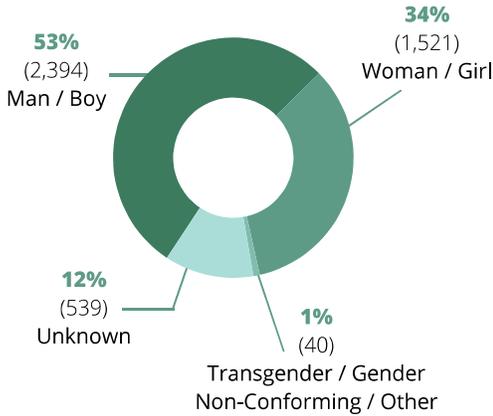

The number of individuals in families (households with Adults and Keiki) steadily decreased from 2015 (n=2,340) to 2022 (n=933), with a slight increase through 2024 (n=1,123). Overall, the number of individuals in families has decreased by more than half since 2015.

*The 2021 Unsheltered PITC was cancelled due to COVID-19. NOTE: All percentages are approximates.

DEMOGRAPHICS

Gender

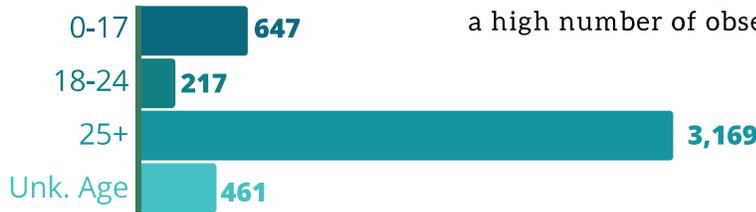

Demographics on all 4,494 individuals are reported here. *All percentages are approximated. For exact numbers, please see the appendices.*

- The majority of the PIT Count population identified as Men/Boys (53%).
- 34% identified as Women/Girls
- 1% identified as Transgender, Gender Non-Conforming or other.
- 12% of the individuals counted were of unknown gender due to a high number of observations.

Adults: Persons 18 years and older.
Keiki: Persons under 18 years old.
Youth: Persons aged 18-24.
Transgender: A general term used to describe people whose gender identity differs from the sex they were assigned at birth.
Gender Non-Conforming: Refers to people who do not adhere to traditional gender roles or stereotypes about how they should look or act based on the sex they were assigned at birth.

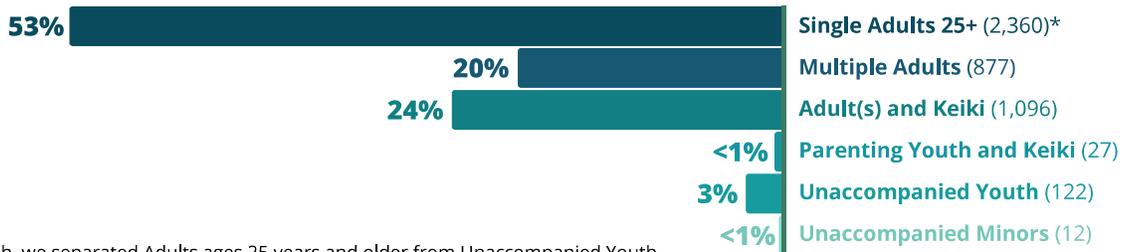

Age Groups

647 keiki were counted in the PIT Count, with 12 keiki as unaccompanied minors. 82% (n=532) of these keiki were sheltered. Of the 217 individuals ages 18-24, 122 were unaccompanied youth and 14 were parenting youth. The remaining 81 youth were in households with adults.

The vast majority (71%, n=3,169) of individuals in the PITC were 25 years or older. Adults in households without keiki accounted for 74% (n=3,359) of the PITC population, including 122 unaccompanied youth. 1,123 individuals were in households with both Adults and Keiki, with 27 of those being parenting youth households.

Individuals in Each Household Type

*For the purposes of this graph, we separated Adults ages 25 years and older from Unaccompanied Youth.
 *For the remainder of the report any reference to Adult will be any persons 18 years old or older.

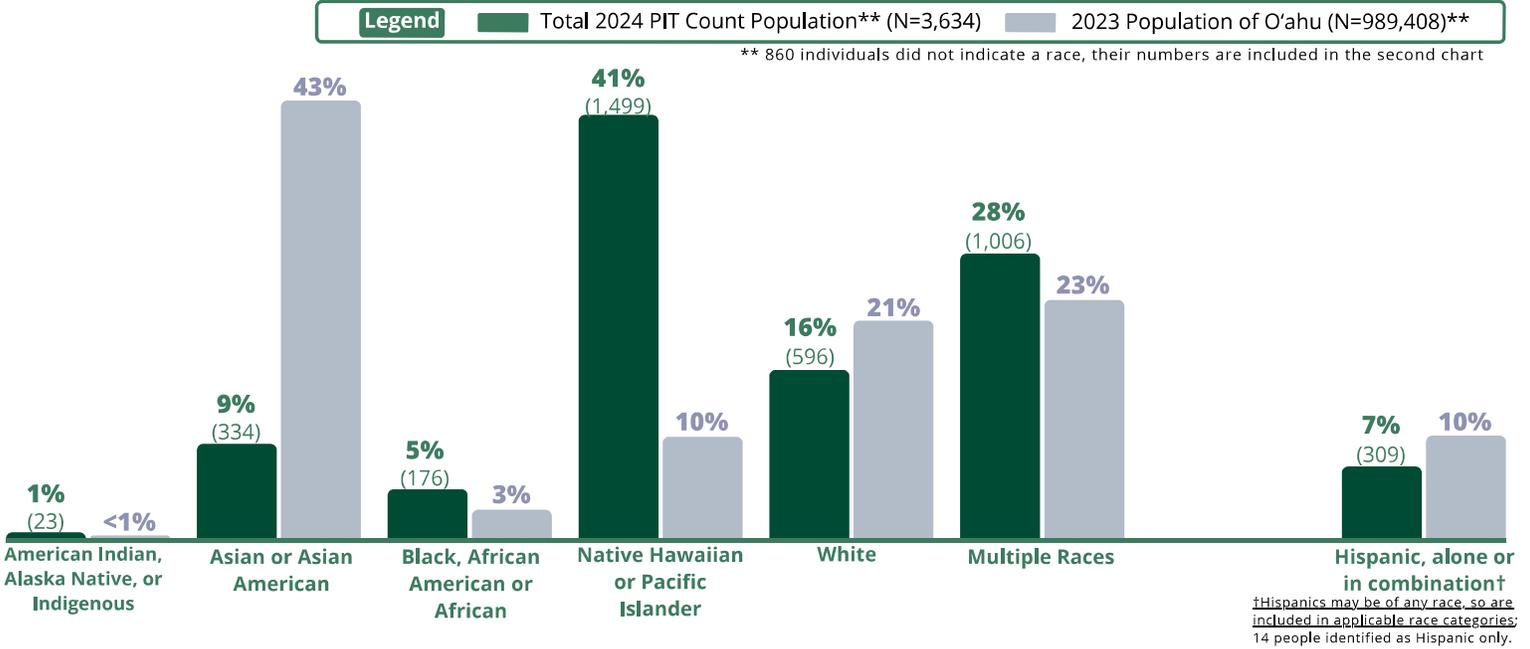

Household: Any group of individuals that presents together for assistance and self-identifies as a family/household. **Single Adults:** Person living alone who is 25 years old or older. **Adult Only Households:** Two or more adults living together with no one under the age of 18. **Adult(s) with Keiki:** One or more adults living with one or more keiki under the age of 18. **Parenting Youth (PY):** Persons age 24 and under living with one or more keiki under the age of 18. **Unaccompanied Youth (UY):** Persons age 24 and under who are not accompanied by a parent, guardian, or household member 25 or older and are not a parent. UY can include single youth, youth couples, and groups of youth together as a household. **Unaccompanied Minors (UM):** Persons under the age of 18 who are not accompanied by a parent, guardian, or household member 25 or older and are not a parent.

RACE & RACIAL EQUITY

Native Hawaiian and Pacific Islanders (NHPI) and multi-racial individuals made up the largest percentages of the PIT Count population. 51% (n=2,295) of the overall PIT Count identified NHPI as either their only race or part of their multiracial identity. 79% (n=793) of multi-racial individuals indicated having NHPI racial background.

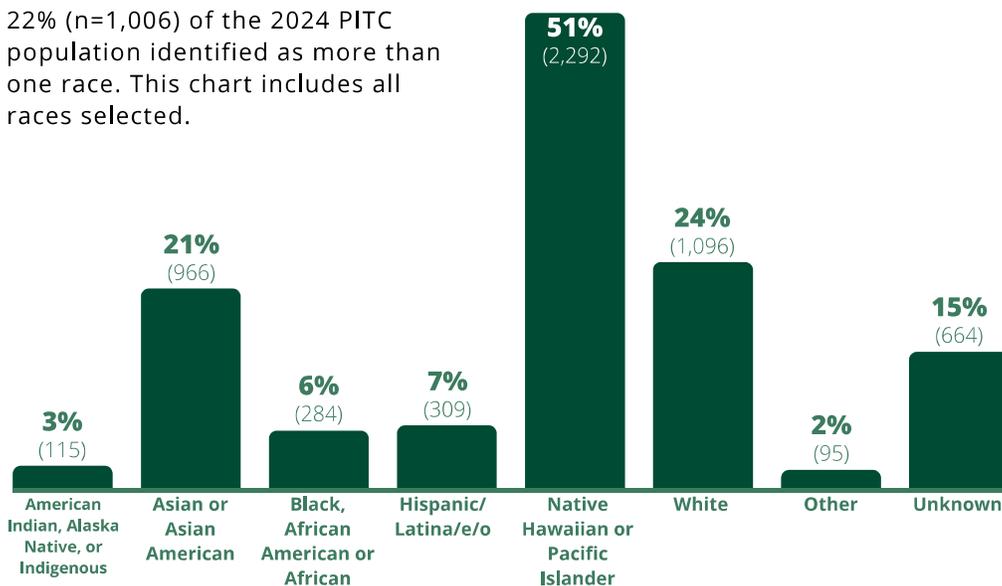

Native Hawaiian and Pacific Islander (NHPI): Person having origins in any of the original peoples of Hawai'i, Guam, Samoa, Tonga, Micronesia, or other Pacific Islands.

Race Alone, 2024 Total PIT Count Population Compared to 2024 O'ahu Population

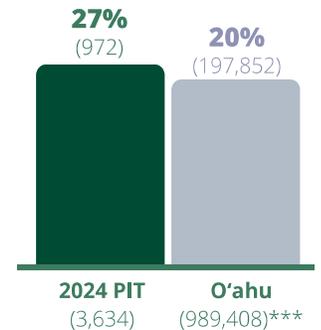

Race Alone or In Combination, Total 2024 PITC Population

22% (n=1,006) of the 2024 PITC population identified as more than one race. This chart includes all races selected.

Native Hawaiian Race (Race Alone or in Combination), 2024 PIT Compared to O'ahu Population.

*All percentages are approximates. **O'ahu race/ethnicity population data obtained from most recent available U.S. Census data for July 1, 2023 (V 2023). ***O'ahu Native Hawaiian data obtained from 2022 US Census Bureau S0201 SELECTED POPULATION PROFILE IN THE UNITED STATES 2022: ACS 1-Year Estimates Selected Population Profiles. †Hispanics may be of any race, so also are included in applicable race categories.

CHARACTERISTICS

This section examines (self-reported) characteristics of 1,308 unsheltered individuals who were surveyed and 1,728 individuals who were sheltered. It excludes the 1,458 unsheltered observations because these individuals were not asked about these conditions. Analyzed data includes 3,036 individuals in 2,030 households, including **2,422 adults**, **11 unaccompanied minors (UM)**, and **603 keiki (excluding UM)**. The bottom number shows the 2023 percentages derived from last year's numbers.

HMIS: The O'ahu Homeless Management Information System (HMIS) is a countywide software program that is designed to capture client-level information over time on services used.

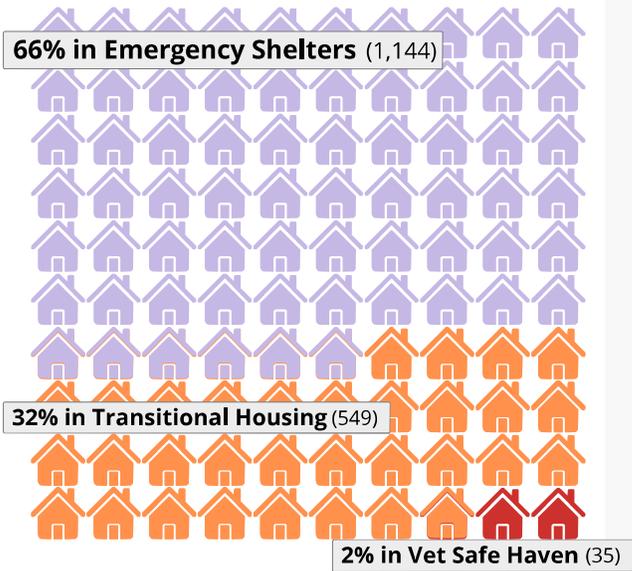

Chronically Homeless: A person who is homeless and lives in a place not meant for human habitation, a safe haven, or in an emergency shelter AND has been homeless for a least 1 year continuously or on at least 4 or more occasions over the past 3 years that add up to at least 12 months AND has a long term disability.

Mental Health Illness, Substance Use, and Physical/Developmental or Other Disability are classified as conditions that substantially impair a person's day to day life.

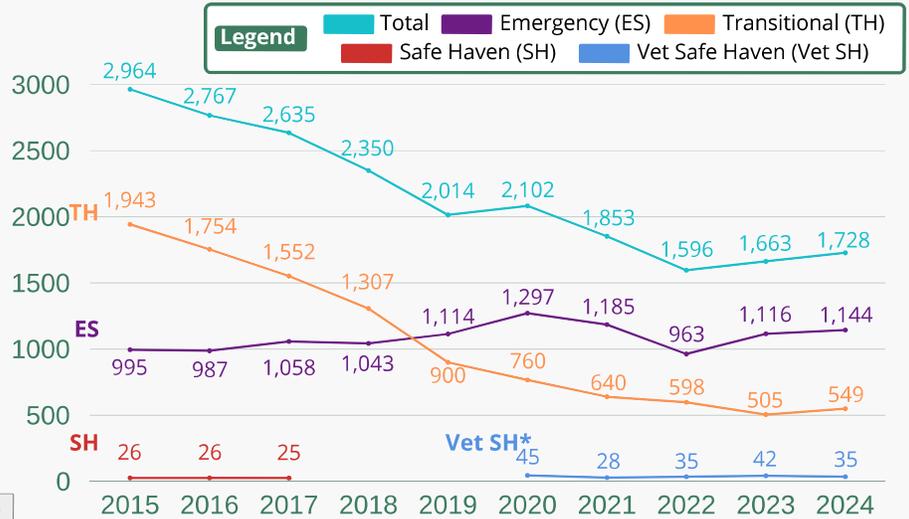

SHELTERED POPULATION

This section examines the characteristics of the 1,728 individuals in 1,018 households counted in the sheltered 2024 PIT Count, including 1,196 adults and 532 keiki, 10 of whom were unaccompanied minors.

2024 Shelter Type (1,728)

Sheltered Population Changes over Time by Type, 2015 - 2024

*Vet Safe Haven was previously labeled under Safe Haven. However, this is separate to HUD-funded Safe Havens and therefore has been separated.

Breaking down the sheltered population by type, the Transitional Housing population during the Point in Time count has decreased by 72% since 2015, from 1,943 in 2015 to 545 in 2024. The Emergency Shelter population increased by 15%. Overall, the total sheltered population in the Point in Time count has decreased by 42% since 2015, from 2,964 in 2015 to 1,728 in 2024.

Nearly half (47%) of all adults and UMs in shelters reported one or more disabling conditions (mental illness, substance use, physical, developmental or other disabilities, and/or HIV); 29% reported a mental illness.

SHELTER AVAILABILITY OVER TIME

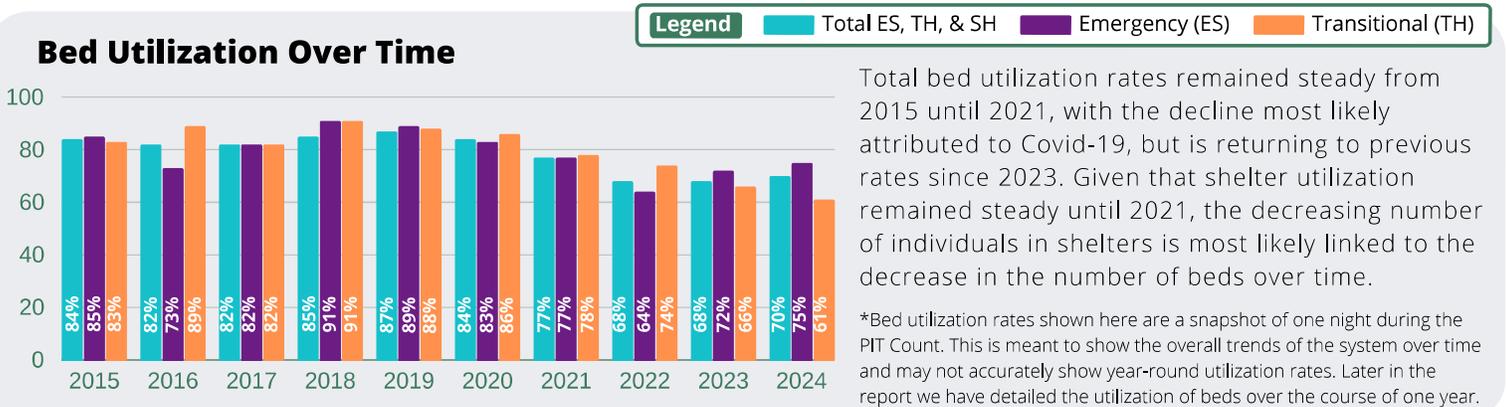

Housing Inventory Count (HIC): The Housing Inventory Count is a count of the number of beds available (in shelter) for individuals on the night of the PIT Count for that given year and the number of individuals served in permanent housing programs on a given day. This number represents the total possible number of individuals that could be staying in each shelter or be housed through permanent housing programs.

Total Shelter HIC Beds vs Total Sheltered Count Over Time

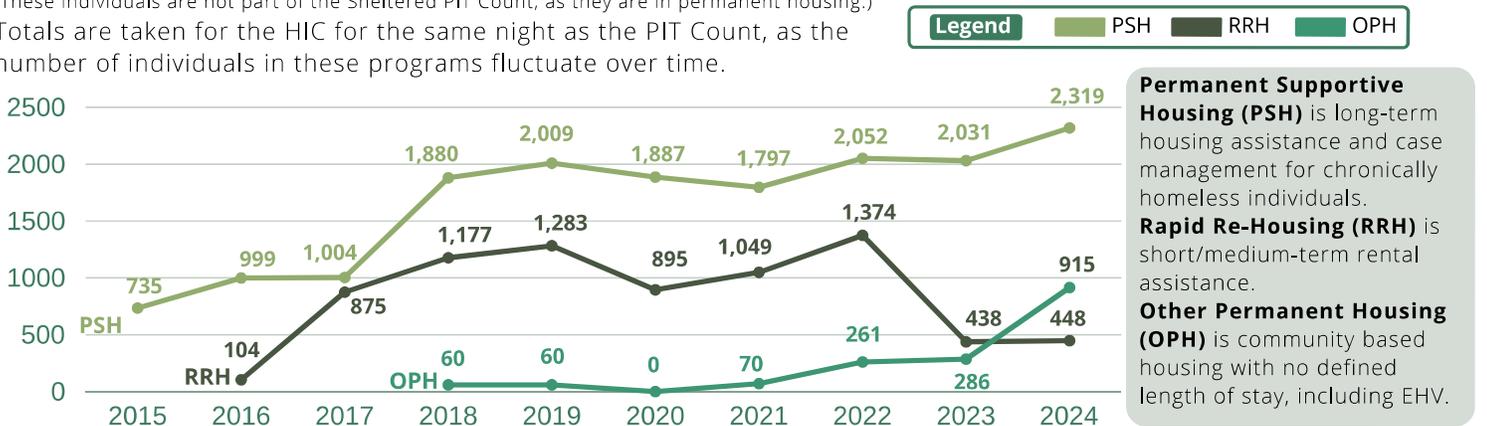

The total number of beds available across all shelters have decreased by 30% since 2015, most notably in Transitional Housing, which had decreased by 66% from 2,354 to 809 beds between 2015 and 2022. The following year saw an increase of 196 Transitional Housing beds and 48 Emergency Shelter beds. Total beds decreased by 5% between 2023 and 2024.

Bed Utilization Over Time

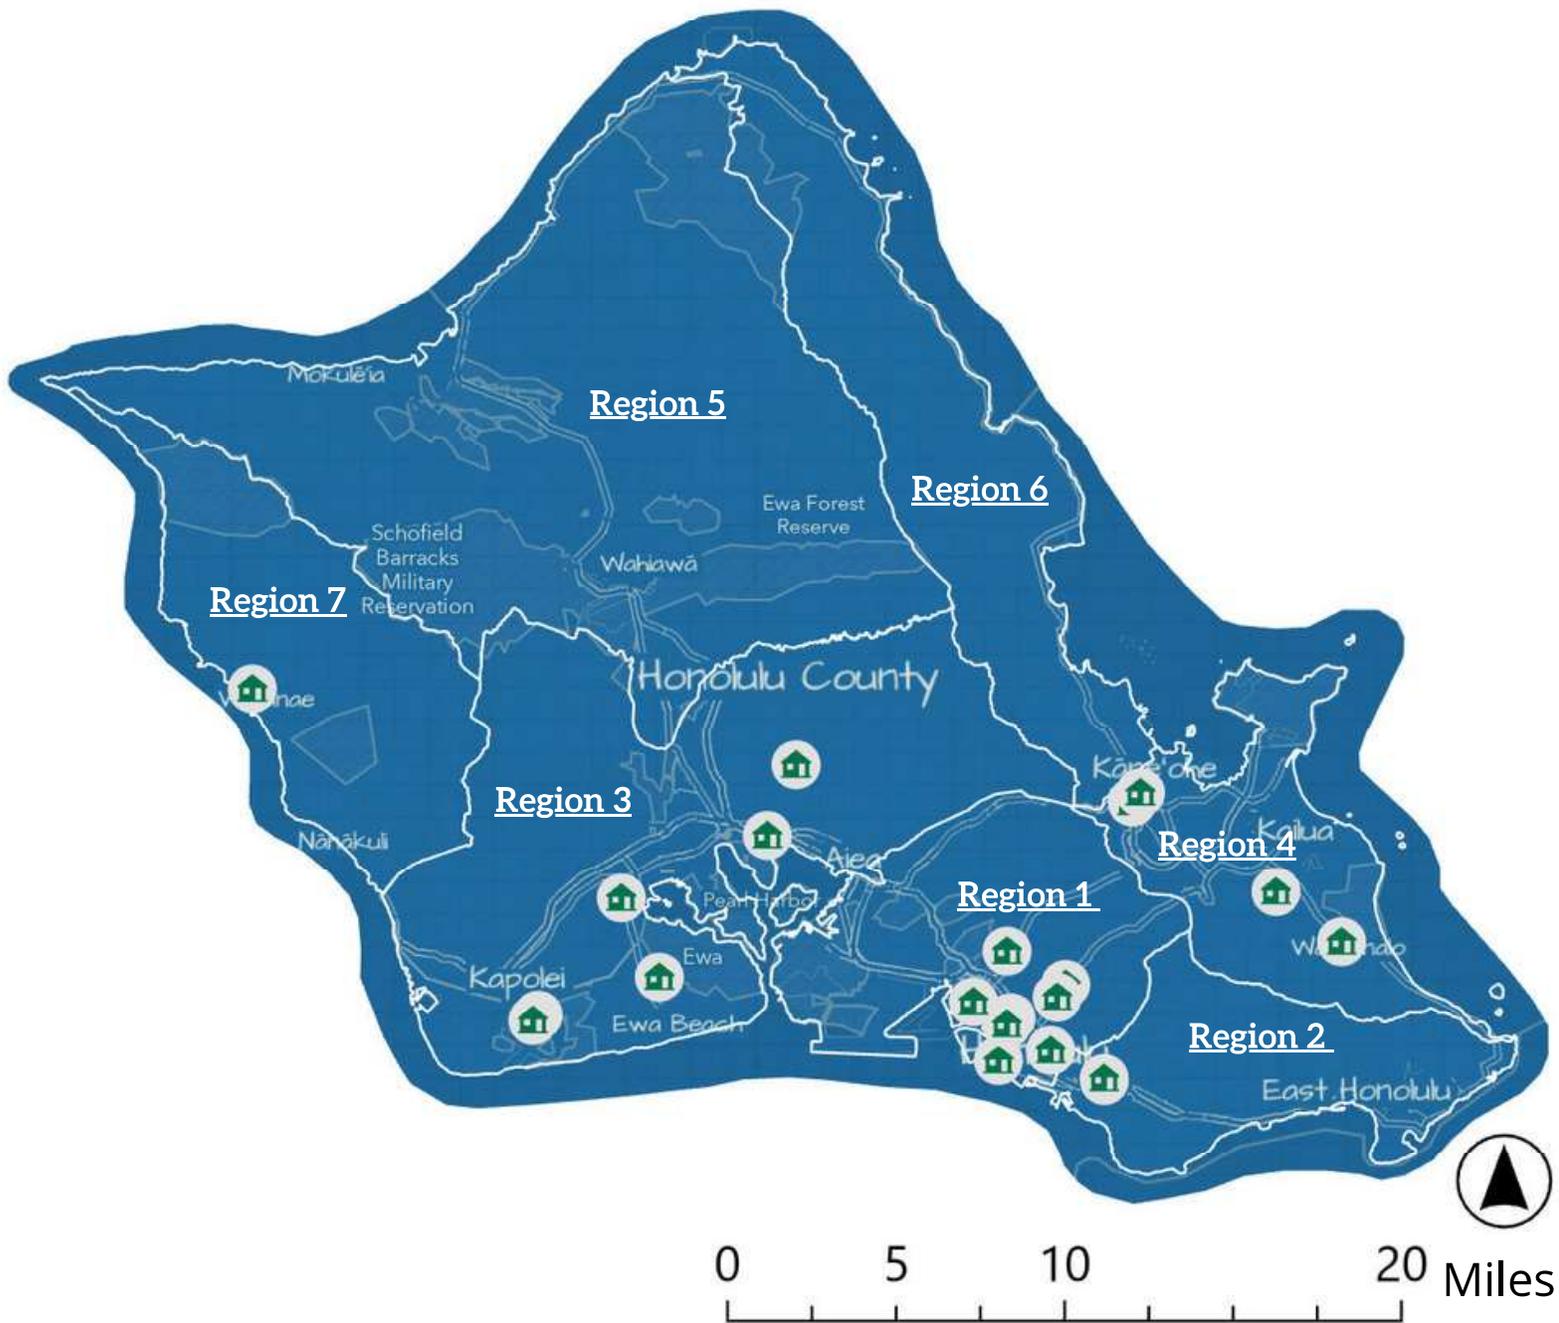

Total Number of Individuals in Permanent Housing Over Time

(These individuals are not part of the Sheltered PIT Count, as they are in permanent housing.) Totals are taken for the HIC for the same night as the PIT Count, as the number of individuals in these programs fluctuate over time.

While the number of beds in shelters is decreasing, we see the number of individuals in Permanent Housing Programs (Rapid Re-Housing, Permanent Supportive Housing, and Other Permanent Housing) increasing over time. This may indicate that despite a lower number of shelter beds available, there has been an increase in permanent housing to meet the population.

2024 EMERGENCY SHELTER AVAILABILITY

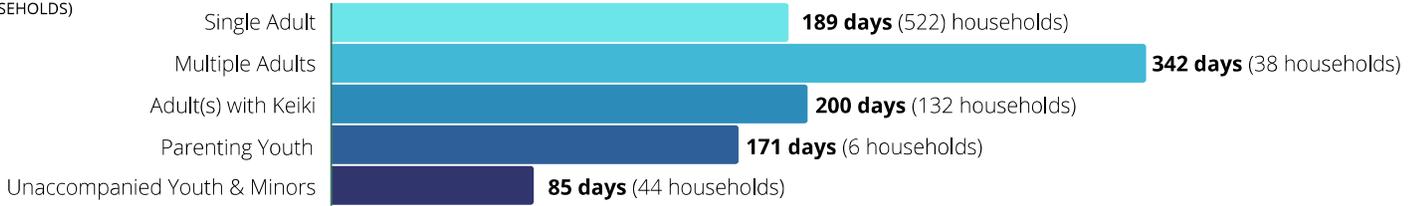

Region	Shelters 🏠	Unsheltered
Region 1: Downtown Honolulu	12	659
Region 2: East Honolulu	2	548
Region 3: Ewa / Kapolei	9	428
Region 4: Kāneʻohe to Waimānalo	6	173
Region 5: Wahiawā / North Shore	0	130
Region 6: Upper Windward	0	45
Region 7: Wai'anana Coast	2	783

DEEPER DIVE: SHELTERED POPULATION

Average Length of Stay in Program* by Program Type and Household Structure

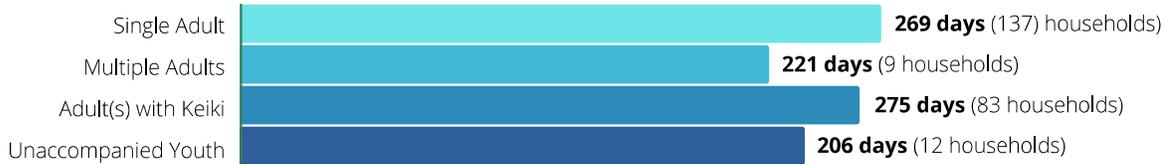

EMERGENCY SHELTER

(742 HOUSEHOLDS)

TRANSITIONAL HOUSING

(241 HOUSEHOLDS)

VET SAFE HAVEN

(35 HOUSEHOLDS)

The overall average length of stay for all household types was 190 days for Emergency Shelter, 265 days for Transitional Housing, and 160 for Vet Safe Haven. All program types experienced a decrease in average length of stay as compared to the 2023 Point in Time Count. (ES 23% decrease; TH 23% decrease, VSH 18% decrease)

*Average Length of Stay through the date of the PITC

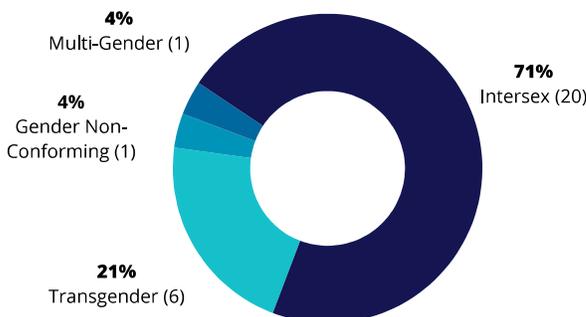

Sexual and Gender Minorities

4% of adults and unaccompanied minors (UM) in shelters in 2024 identify as a Sexual or Gender Minority, through gender, orientation, or being born intersex. In excluding missing data, that percentage rises to 9%.

Sexual & Gender Minorities (SGM): An umbrella term that encompasses populations included in the acronym "LGBTQIA+" (lesbian, gay, bisexual, transgender, questioning, intersex, asexual, and gender diverse individuals) and individuals whose sexual orientation or gender identity varies.

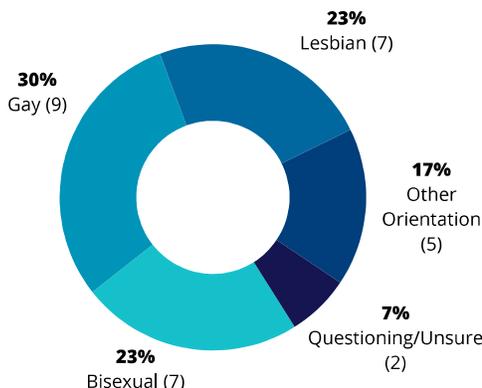

Gender Diverse

2% (n=28) of adults and UMs in shelters identify as Gender Diverse. This means that the individual identifies as a gender other than the sex they were assigned at birth.

Orientation Diverse

2% (n=30) of adults and UMs in shelters identify with a sexual orientation other than straight.

52

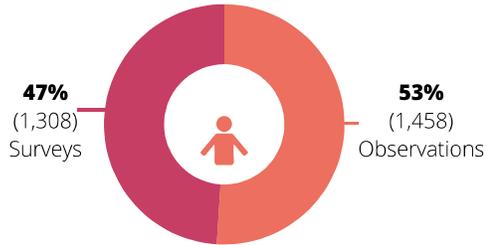

sheltered adults & UMs (4%), identified as being a **Sexual or Gender Minority**

30 orientation diverse only
28 gender diverse only
6 both gender & orientation diverse

UNSHELTERED POPULATION

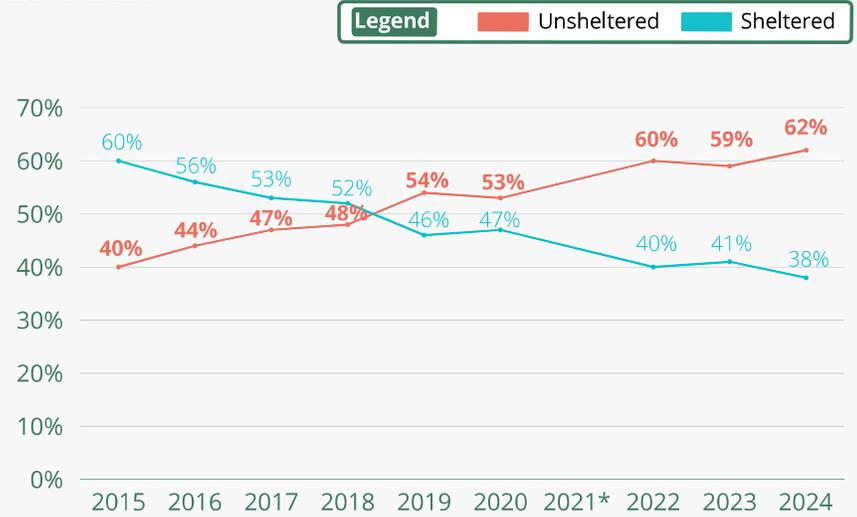

This section examines the characteristics of the 2,766 individuals in 2,103 households counted in the unsheltered 2024 PIT Count, including 2,654 adults, 2 unaccompanied minors, and 113 keiki.

2024 Unsheltered Population (2,766)

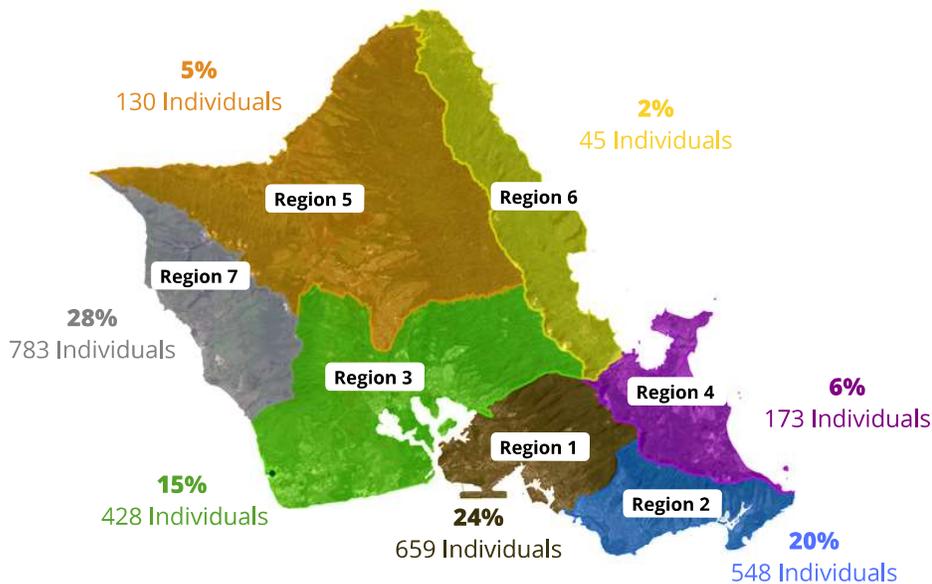

Since 2015, the percentage of the PITC population that is unsheltered has increased steadily, while the percentage of the PITC that is sheltered has decreased. 62% of the 2024 PITC was unsheltered, compared to just 40% in 2015.

Unsheltered Percent of Total PIT, Change over Time, 2015-2024

Prior to 2020, the unsheltered population was counted using a survey conducted over multiple days. Since 2020, the Unsheltered Count has included surveys and observations conducted on one day.

Percent of Total O'ahu Unsheltered Population by Region (2,766)

Region 7 (Wai'anae) has the largest percentage of the unsheltered population at 28%. This region saw a 24% increase in the number of unsheltered from the 2023 count, which rose from 630 to 783.

Region 1 (Downtown Honolulu, Kalihi, Nu'uuanu) and Region 2 (East Honolulu) have the second largest percentages of the unsheltered population with 24% and 20% respectively.

Region 6 (Windward) has the island's smallest percentage of the unsheltered population at 2%; followed by Region 5 at 5% and Region 4 at 6%.

NOTE: All percentages are approximates.

*The 2021 Unsheltered PIT Count was canceled due to COVID-19.

Individuals by Household Type

Region 2 has the largest percentage of single adult households and individuals who identify as a man/boy compared to other regions. Since 2019, the number of people in this region has increased 68%; however, numbers have decreased slightly since 2022. Compared to the overall unsheltered population, Region 2 has a larger percentage of individuals identifying as White. It also has the largest percentage of unsheltered veterans.

Percent of Unsheltered Individuals in Region 2, 2010-2024

Individuals by Household Type

Region 3's percent of the unsheltered population has increased steadily since 2015, and the number of individuals counted in the region has more than tripled from 2015 to 2024. Region 3 has a slightly smaller percentage of individuals identifying as White compared to the overall unsheltered population. It also has a large percentage of adults in multiple adult households.

Percent of Unsheltered Individuals in Region 3, 2010-2024

NOTE: All percentages are approximates.

Individuals by Household Type

Region 5 saw a sharp decrease from 2017 to 2020 in its percent of the unsheltered population and has stayed at or below 7% since 2020. While Region 5 has a small percentage of all the unsheltered chronically homeless households (5%), a large percentage of the individuals in Region 5 were chronically homeless (71%). This region also has the largest percentage of unsheltered unaccompanied youth, along with Region 4.

Individuals by Household Type

2% of the unsheltered homeless population was counted in Region 6, the lowest percent of the 2024 PITC. Please note that due to the small number of people in Region 6, percentages can be highly affected by small changes in absolute numbers. Region 6 had a larger percentage of individuals identifying as NHPI and as a woman/girl compared to the overall unsheltered population.

PITC MOVEMENT BETWEEN REGIONS MAP

DEEPER DIVE: UNSHELTERED SURVEYED

This section examines data collected on 1,308 people in 1,016 households, including 1,226 adults, 1 unaccompanied minor, and 81 keiki that completed surveys. This data is not available for the 1,458 individuals who were observed. The in-depth surveys offer the chance to examine important individual and system data.

59% (n=767) of the unsheltered surveyed individuals had records in the O'ahu HMIS. Of the unsheltered individuals with HMIS records, 41% (n=317) had at least one open enrollment in HMIS at the time of the PIT Count.

VI-SPDAT: The VI-SPDAT is an assessment used by our community, among many others, to measure vulnerability and housing needs. The assessment is comprised of a series of personal questions about an individual or family's history of housing and homelessness. The responses help to determine the order in which people may be contacted for housing units filled from our community's Housing Priority List.

DEEPER DIVE: UNSHELTERED SURVEYED

Self-Reported Factors Leading to Homelessness*

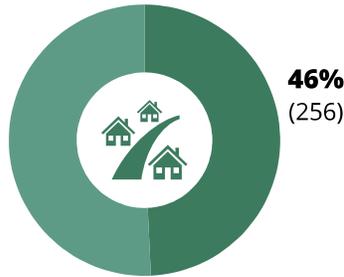

The most common self-reported causes of homelessness among surveyed adults and unaccompanied minors were financial and/or employment factors, the most common of which was inability to pay rent. These findings are in line with a recent study of unsheltered homeless in Atlanta that found loss of job and financial factors were the most frequently reported causes of homelessness (Barile, Pruitt, & Parker, 2018). Health-related causes were the second most frequently reported reason.

*Surveyed individuals may choose multiple reasons for why they are currently experiencing homelessness. **Unable to Pay Rent is included in Financial Reasons. COVID is included in Health Reasons.

Hawaiian Homelands

Of unsheltered surveyed adults, 555 identified as Native Hawaiian. Of these, 46% (n=256) indicated they were eligible for Hawaiian Homelands.

Percent of Native Hawaiian Adults (555) Eligible for Hawaiian Homelands

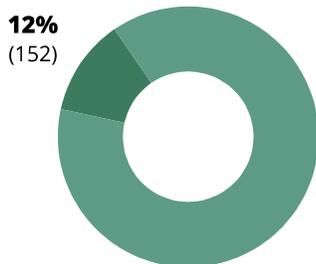

Hawaiian Homelands Lease:

In order to qualify for a new lease award on Hawaiian Homelands, you must be at least 50% Native Hawaiian and be 18 years of age or older.

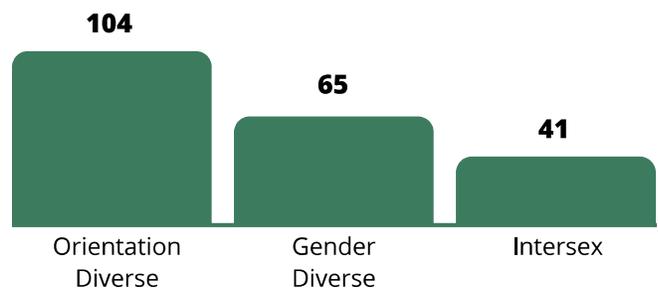

Sexual and Gender Minorities (SGM)

12% (152) of unsheltered surveyed adults and UM (1,227) identified as a SGM. Individuals who identify as SGM are at a higher risk of homelessness, exploitation, and violence than their cis-gendered peers. It is important to note that gender identity and sexual orientation may be fluid for some and therefore individuals may identify within multiple SGM types.

Household Type

Domestic violence survivors account for 12% (530) of the total 2024 PIT population. However, keiki are not asked about domestic violence. Of adults, 22% reported being a domestic violence survivor.

The number of DV survivors and their percent of the total PIT population has been increasing since 2018, when this data began being reliably collected.

In 2024, the DV survivor population had higher rates of people who identify as Women/Girls (60%) compared to the overall PITC population (34%). The DV survivor population also had a higher percentage of single adult households and a higher percentage of survivors identifying as multiple races when compared to the total PITC population.

Additionally, the DV survivor population had higher rates of chronically homeless individuals (48%) compared to the overall PIT Count population (40%) and higher rates of all mental illness and substance use disorders.

O'AHU HMIS INFLOW - OUTFLOW

While the PIT Count analyzes homelessness on one night of the year, the HMIS Inflow-Outflow section examines enrollment and exit data taken from the O'ahu CoC Homeless Management Information System, to identify trends in system engagement between February 2023 and January 2024. Not all individuals in HMIS are currently experiencing homelessness, some are housed. A client may be enrolled in multiple programs at one time and may have been enrolled in the same project type multiple times in one year.

12,441

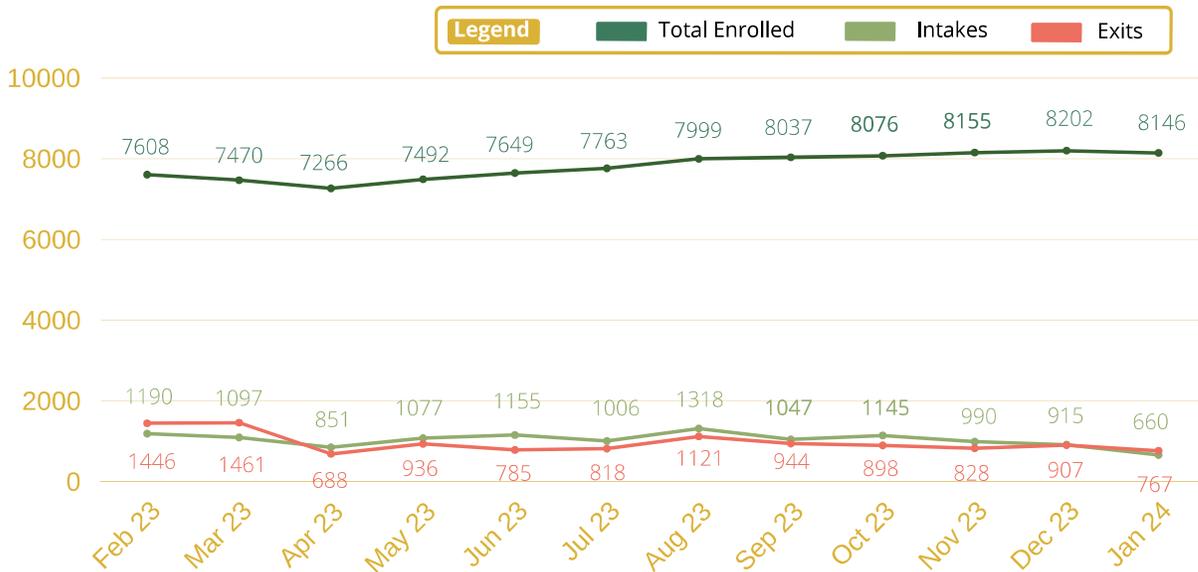

(12,855 in 2023)

people engaging in services between February 2023 - January 2024

23,740 enrollments

9,645 adults and 2,771 keiki

TOTAL INFLOW OUTFLOW BY MONTH, 2022 - 2024

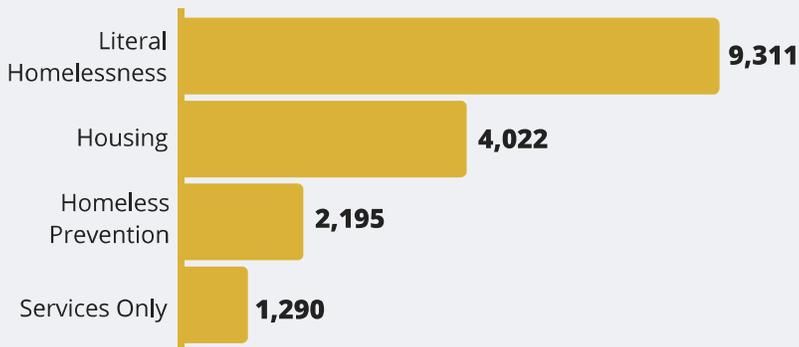

15,461 intakes

15,587 exits

The monthly counts of enrollments increased over 2023.

There was a total of 126 (0.1%) more exits than intakes between Feb 23 and Jan 24.

Enrollments by Project Type

Breakdowns of all 23,740 enrollments are reported here.

Literal homelessness programs include:

- Emergency Shelter (4,424), Street Outreach (3,526), Transitional Housing (1,227), and Safe Haven (134)

Permanent Housing programs include:

- Housing Only (67), Housing with Services (2,544), Permanent Supportive Housing (1,303), Rapid Rehousing (1,303)
- 88% (3,550) of Housing enrollments had a move-in date

O'AHU HMIS INFLOW - OUTFLOW

The O'ahu CoC Homeless Management Information System includes all program types, meaning not all individuals in HMIS are currently experiencing homelessness, some are housed or at risk of homelessness. This section looks specifically at programs that serve only those experiencing literal homelessness. These include Emergency Shelters, Save Havens, Transitional Housing, and Street Outreach programs.

6,438

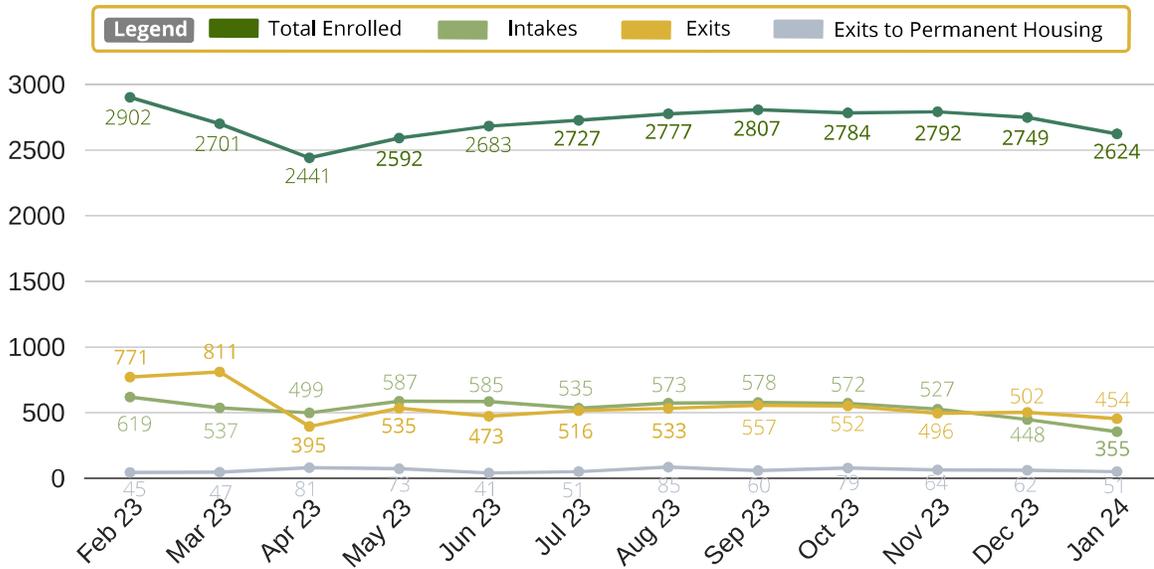

(6,618 in 2023)

people engaged in literal homelessness programs between Feb 2023 and Jan 2024

12,949 enrollments

5,290 adults and 1,134 keiki

LITERAL PROGRAM INFLOW OUTFLOW BY MONTH, 2023 - 2024

6,415 intakes

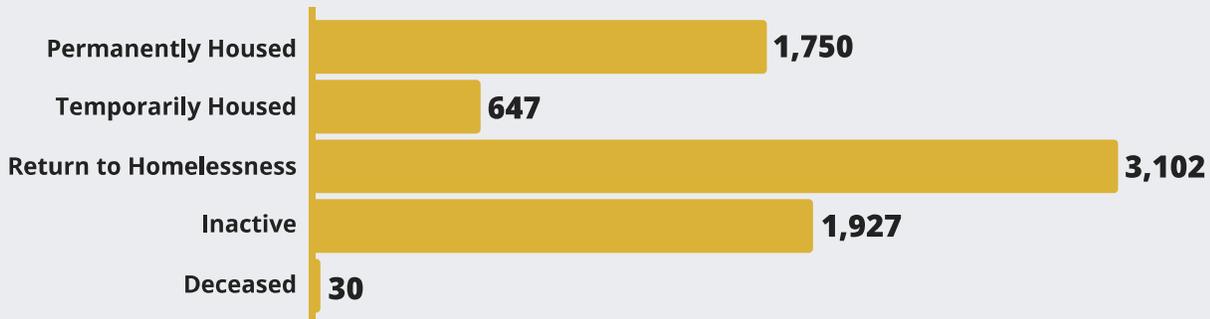

6,840 exits

Total enrollments in literal homelessness were steady after HMIS migration to Clarity, its new data platform.

Intakes and exits were close in number, with exits slightly outpacing intakes at the end of 2023.

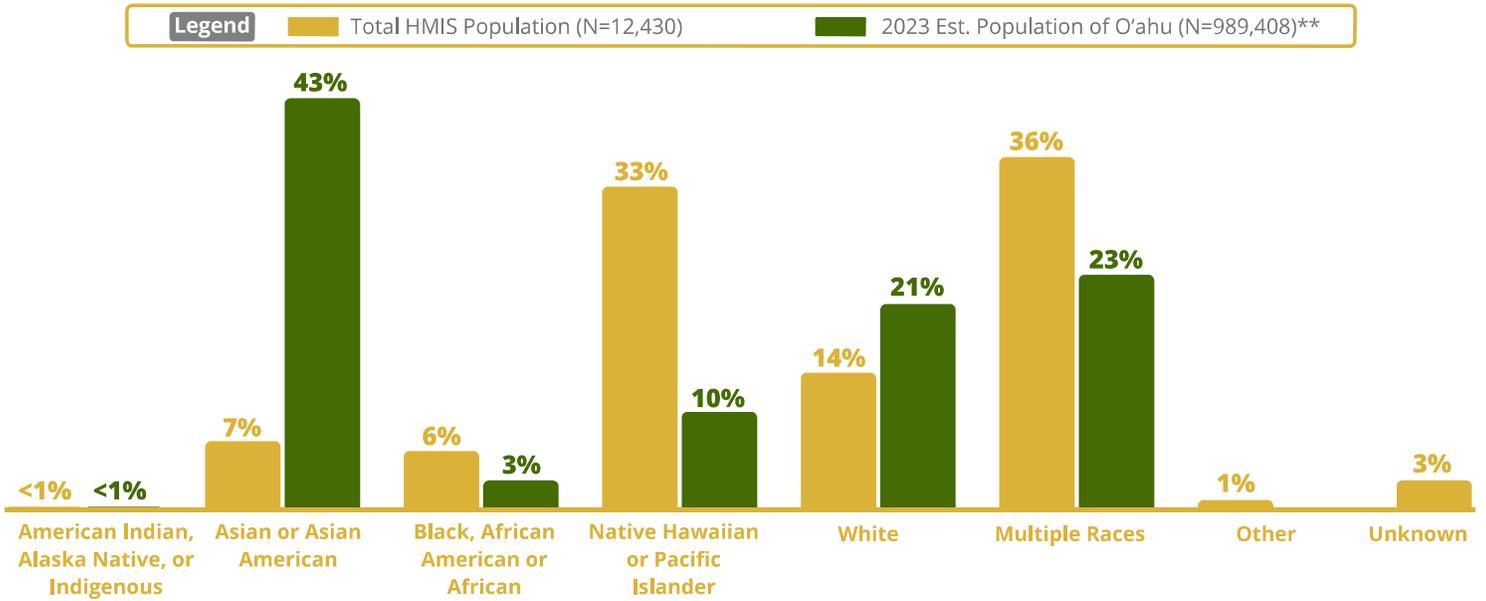

Exit Destination

There were 7,456 (8,633 in 2023) exits from Emergency Shelter, Safe Haven, Transitional Housing, and Street Outreach programs with 23% (1,750) going to permanent housing and 9% (674) to temporary housing. 67% (5,029) of exits were to homelessness or an unknown destination assumed as inactivity.

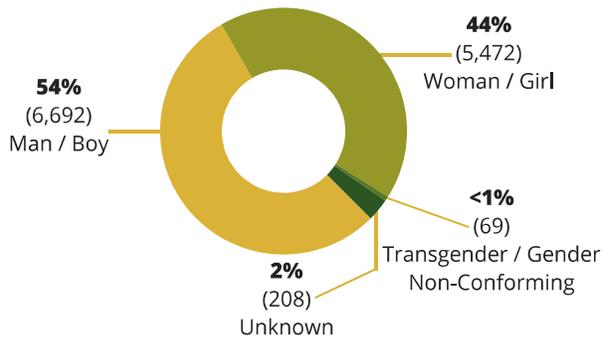

O'AHU HMIS INFLOW - OUTFLOW

RACE ALONE IN TOTAL HMIS AND O'AHU POPULATIONS

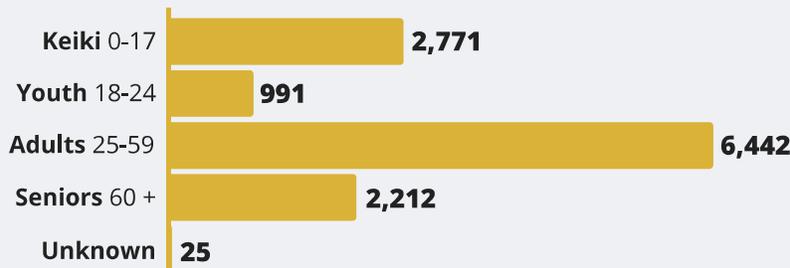

Comparing the percentage of each of the racial groups on O'ahu to the percentage of each of the racial groups included in the HMIS between 2023 and 2024: Native Hawaiian and Pacific Islanders, American Indian, Alaska Native, or Indigenous (AIANI), and Black, African American, or African individuals were all over-represented in the Homeless Population.

Gender

Just over half of HMIS participants identified as male (54%) with almost half female (44%) and a small number of transgender, questioning, or something other than male or female (<1%).

Age Groups

Almost one quarter of HMIS participants were under 18 (22%). 8% were Transitional Age Youth, just over half were adults between 18 and 59 (52%), and 18% were 60 years of age or older.

The average age was 37.

O'AHU HMIS INFLOW - OUTFLOW

This section examines characteristics of all 12,441 participants in the O'ahu CoC Homeless Management Information System. Most of this information is asked each time someone is enrolled into a program and therefore was filtered to the most recent information collected in the reporting time period.

Households by Type

A large majority of the 15,461 households enrolled in programs in HMIS were single adults or individuals (81%). 5% of households were multiple adults only. 13% were households with adults and children, and less than 1% were made up of only children or children on their own.

NEXT STEPS & CONCLUSION

Continued Research

Partners In Care plans to use the 2024 PIT Count data to explore relevant issues and populations in more depth and to disseminate these findings in a format that will be most useful for service providers and policy makers. These plans include:

- Releasing multiple **sub-reports** highlighting these findings.
- Developing online **dashboards** that provide easy access to numbers and breakdowns by region.

Partners In Care also plans to continue using PIT Count data from the past 6 years to help identify PIT Count "repeaters" and connect them to services.

Conclusion

This report was created in collaboration with all partner homeless service providers, volunteers, individuals with lived experience of homelessness, and the community.

We appreciate questions, suggestions, and new ideas based on the information within this report and any additional reports that follow. We hope that the information contained within the report will assist communities and policy makers in making effective, efficient decisions that will lead to the decrease and eventual elimination of homelessness on O'ahu.

For more information on Partners In Care and the work that we do, please go to our website at www.partnersincareoahu.org.

Forthcoming Sub-Reports:

Native Hawaiians
